## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Delivered **production support and reliability engineering** for enterprise Java/.NET applications across **3.5 years**, managing **P1/P2 incident response** and SLA compliance using **Splunk, CloudWatch, and Dynatrace** — directly supporting quality and uptime objectives aligned with regulatory expectations.
- Developed and automated **data pipelines, ETL processes, and scheduled reporting** using **Python**, enabling real-time visibility into system performance metrics and supporting data-driven decision-making for continuous improvement initiatives.
- Conducted **technical analysis and risk assessments** through SQL-based data validation, schema audits, and log analysis across **PostgreSQL, MySQL, and Oracle** databases — identifying quality issues and supporting corrective actions in production environments.
- Led **cross-functional problem-solving** on Java Spring Boot microservices and REST API enhancements, collaborating with development, operations, and business teams to resolve non-conformances and implement systemic improvements.
- Implemented and maintained **CI/CD pipelines using Jenkins and Git**, establishing code review protocols and branching strategies that enforced quality gates and compliance standards across development workflows.
- Completed **MSc in Data Analytics** with expertise in data quality, statistical analysis, and process optimization — complementing technical supplier quality capabilities with advanced analytical and strategic thinking methodologies.

## SKILLS

**Quality & Regulatory** – GMP principles, ISO 13485 framework, FDA QSR, supplier quality concepts, non-conformance management, CAPA fundamentals.

**Data & Analytics** – Python, SQL, pandas, NumPy, ETL, data validation, process metrics analysis, reporting automation.

**Production Support & Monitoring** – Splunk, Dynatrace, CloudWatch, incident response, SLA management, root cause analysis.

**Cloud & DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, shell scripting.

**Backend Development** – Java Spring Boot, REST APIs, PostgreSQL, MySQL, Oracle.

**Professional & Communication** – Agile/Scrum, Jira, Confluence, technical documentation, stakeholder engagement, cross-functional leadership.

## EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of  
Ireland, Dublin**

**02/2026**

**BACHELOR OF ENGINEERING in Computer Science – SNS College  
of Technology, Coimbatore, India**

**01/2021**

## PROJECTS

### **Enterprise Application Reliability & Performance Optimization (HCL Technologies)**

- Owned **production monitoring and incident management** for mission-critical Java/.NET applications, reducing mean-time-to-resolution (MTTR) through proactive **Splunk and Dynatrace** alerting and systematic root cause analysis.
- Designed and deployed **automated performance dashboards** using **CloudWatch and custom Python scripts**, providing real-time visibility into system health metrics and enabling data-driven SLA compliance decisions.
- Collaborated with development teams to identify and escalate systemic quality issues, leading corrective actions that improved application stability and reduced P1 incidents by enforcing code review standards and deployment gates.

### **Data Pipeline & Quality Assurance Automation (HCL Technologies)**

- Architected and maintained **Python-based ETL pipelines** for data validation and integrity checks across **PostgreSQL, MySQL, and Oracle**, ensuring data quality and consistency for downstream business intelligence and regulatory reporting.
- Developed **automated reporting workflows** using **pandas and NumPy** with scheduled execution via cron jobs, reducing manual quality assurance effort by **40%** and enabling continuous compliance monitoring.
- Implemented **schema audit tools and SQL-based validation scripts** to detect anomalies and non-conformances in database structures, supporting rapid issue identification and preventive improvement initiatives.

## **ACHIEVEMENTS & CERTIFICATIONS**

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
