PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Assisted engineering teams in analysing manufacturing data to identify trends and root causes for non-conforming materials, contributing to corrective action implementation.
- Supported the development and implementation of process improvements by assisting in the research and validation of changes to equipment and test methods, aiming to enhance yield.
- Contributed to new product introduction by providing input on traceability and inspection requirements and assisting in the creation of manufacturing instructions and training materials.
- Collected, compiled, and organised data for qualification and validation studies, maintaining detailed lab notebooks and assisting in report generation.
- Performed operator certification and on-the-job training for basic processes and engineering changes, ensuring adherence to updated procedures.
- Identified manufacturing issues by collaborating with engineering to determine root causes and implement corrective and preventative actions.
- Maintained confidentiality in handling sensitive information and documents, solving problems of moderate scope and complexity through interpretation of defined procedures.

SKILLS

Quality Assurance – Corrective and Preventative Actions (CAPA), Root Cause Analysis, Non-conforming Material Disposition, Process Improvement, New Product Introduction (NPI), Qualification and Validation Studies, Operator Training, Quality Tools, Manufacturing Processes

Data Analysis – Numerical Data Analysis, Statistical Data Analysis, Computer Software Programs

Technical Skills – Technical Assistance, Engineering Support, Test Methods

Project Management – Planning, Organisation, Prioritisation

Communication & Teamwork – Cross-functional Communication, Mentoring, Technical Presentations, Procedure Writing

PROJECTS

Manufacturing Process Improvement Initiative

- Assisted in analysing production data from a high-volume medical device manufacturing line to identify bottlenecks and areas for yield improvement.
- Supported engineering in researching and validating changes to automated assembly equipment and associated test methods, contributing to a 15% reduction in cycle time for a key sub-assembly.
- Documented standard operating procedures for new quality control checkpoints implemented as part of the process improvement project.

Operator Training Material Development

- Collaborated with senior engineers to develop and refine training materials for operators on new manufacturing processes and equipment updates.
- Assisted in performing operator certifications and documenting on-the-job training completion for a team of 20 production floor staff.
- Contributed to the disposition process for non-conforming materials by documenting findings and assisting in root cause analysis sessions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
