+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Partnered with internal stakeholders to identify business needs and opportunities, facilitating requirements workshops and discovery sessions to define clear business, functional, and technical requirements.
- Assessed existing enterprise IT systems, processes, and ways of working, mapping current workflows and developing practical future-state process maps to inform system enhancements.
- Translated complex business needs into actionable requirements for technology and delivery teams, creating process maps, user stories, and acceptance criteria to guide solution development.
- Collaborated with technology, operations, project, and testing teams across the delivery lifecycle, supporting solution design, testing, and implementation to ensure alignment with business objectives.
- Supported implementation and adoption of system changes, including change management for system configuration updates and coordination of User Acceptance Testing (UAT) across interconnected enterprise platforms.
- Analyzed system integrations, data flows, and technical dependencies to identify gaps and risks, documenting these findings to support robust system architecture and delivery.
- Managed production support for enterprise applications, including SLA adherence, P1/P2 incident response, and root cause analysis using tools like **Splunk** and **Dynatrace**.

## SKILLS

**Business Analysis** – Requirements Gathering, Process Mapping, User Stories, Acceptance Criteria, Stakeholder Interviews, Documentation, System Analysis, UAT Support, Change Management

**Enterprise Platforms** – Microsoft 365, Workflow Systems, ERP Systems, Core Business Systems

**Delivery Methodologies** – Agile, Waterfall, Scrum, Hybrid Delivery

**Technical Skills** – System Integrations, Data Flows, Technical Dependencies, REST APIs, SQL, Python Scripting

**Observability & Support** – Splunk, Dynatrace, CloudWatch, Incident Response, SLA Management

## PROJECTS

### Enterprise System Integration Analysis

- Mapped current-state data flows and system integration points between an ERP system and supporting operational platforms for a financial services client, identifying 15+ critical dependencies.
- Defined future-state integration requirements and documented technical specifications for a REST API-based data exchange, enabling seamless data synchronization across PostgreSQL and Oracle databases.
- Collaborated with business analysts and operations teams to document functional requirements and acceptance criteria for system enhancements, ensuring alignment with client needs.

### Business Process Automation Initiative

- Developed Python scripts to automate data validation and reporting tasks for enterprise business systems, reducing manual effort by approximately 20% per reporting cycle.
- Created detailed process maps and user stories outlining proposed workflow improvements for a finance operations dashboard, facilitating UAT and post-implementation reviews.
- Supported the implementation of system configuration changes using change-control management procedures, ensuring smooth transitions for end-users.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
