HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered and maintained **Linux** based production infrastructure, including provisioning, configuration, patching, and performance tuning for trading and research systems.
- Developed automation and operational workflows using **Python** and **Bash** scripting to improve operational efficiency and reduce manual toil.
- Supported mission-critical production systems by performing incident response, troubleshooting, and root-cause analysis across application, operating system, and network layers.
- Built and maintained **observability** solutions encompassing metrics, logging, tracing, and alerting for high-performance infrastructure.
- Improved deployment pipelines and implemented **infrastructure-as-code** practices to enhance release processes and system resilience.
- Collaborated with software engineers and trading teams to solve complex technical problems, focusing on reliability and performance for latency-sensitive workloads.
- Conducted performance analysis and capacity planning, identifying and eliminating operational inefficiencies through automation and reusable engineering solutions.

SKILLS

Operating System – Linux, Bash Scripting

Programming Languages – Python

Infrastructure & Cloud – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes

Automation & CI/CD – Jenkins, Git, Configuration Management

Networking – TCP/IP, UDP, DNS, Routing, Switching

Observability – Metrics, Logging, Tracing, Alerting, Splunk, Dynatrace

PROJECTS

Linux Infrastructure Automation Platform

- Developed a suite of **Python** scripts to automate the provisioning and configuration of **Linux** servers on **AWS**, reducing deployment time by **30%**.
- Implemented **Ansible** playbooks for consistent configuration management across a fleet of over 100 servers, ensuring adherence to hardening standards.
- Integrated automated health checks and monitoring alerts using **Prometheus** and **Grafana** for proactive incident detection.

Production System Observability Enhancement

- Designed and deployed a centralized logging solution using **ELK Stack** (Elasticsearch, Logstash, Kibana) to aggregate logs from distributed applications and **Linux** systems.
- Configured real-time alerting rules in **Splunk** based on critical error patterns, reducing average detection time for P1 incidents by approximately **25 minutes**.
- Developed custom dashboards in **Dynatrace** to visualize system performance metrics and application traces, aiding in rapid troubleshooting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
