PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Chaired technical review meetings for modification projects, providing status reporting on project health and managing technical risks, issues, and opportunities.
- Collaborated with customers, outside vendors, MROs, and regulatory agencies to develop safe, compliant, and practical engineering solutions for aircraft modifications.
- Provided technical support to Project Managers, acting as the primary technical focal in assigned modification projects and ensuring alignment with program objectives.
- Contributed to the design and certification of aircraft modifications, including cabin interior changes and IFE upgrades, ensuring adherence to EASA requirements.
- Supported project ITCM, PDR, and CDR meetings, identifying key technical risks and developing mitigation strategies for complex engineering programs.
- Developed Python scripts for automating data processing and generating scheduled reports, improving efficiency for operational teams.
- Containerized Java Spring Boot applications using Docker and deployed them to AWS EC2 instances, enhancing deployment consistency and scalability.

SKILLS

Engineering – Project Management, Technical Leadership, Risk Management, Regulatory Compliance, EASA, CS-25, Part 21J, Airworthiness.

Software Development – Java, Spring Boot, REST APIs, Python, Scripting, Docker, AWS, EC2, Git, Jenkins.

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, SQL, PostgreSQL, MySQL, Oracle.

Aerospace – Commercial Aircraft Interiors, Modification Programs, Integrated Project Teams (IPT).

Tools & Methodologies – Jira, Confluence, Agile, Scrum, Change Management, CI/CD.

PROJECTS

Aircraft Modification Program Management Simulation

- Modeled a complex aircraft modification program, defining project scope, technical requirements, and key milestones for cabin interior and IFE upgrades.
- Developed a risk register identifying potential technical challenges and outlining mitigation strategies, including EASA regulatory compliance considerations.
- Created status reports and PDR/CDR documentation to simulate project health tracking and stakeholder communication within an integrated project team.

Automated Data Reporting System

- Engineered a Python-based system to automate the extraction, transformation, and loading of operational data from PostgreSQL into a reporting database.
- Developed Power BI dashboards to visualize key performance indicators derived from the processed data, enabling stakeholders to monitor system health and performance.
- Implemented scheduled data refresh jobs using cron on Linux, ensuring timely availability of up-to-date reports for operational analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
