PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered reusable **React** components and managed application state using **TypeScript**, contributing to the development of a complex enterprise SaaS platform.
- Collaborated closely with Product and Design teams to translate loosely defined requirements into actionable technical designs and deliver new features from conception to production.
- Implemented **AI-assisted development** workflows using tools like Claude Code, refining prompts and agent scaffolding to enhance team productivity and code quality.
- Owned the full lifecycle of shipped features, including monitoring production behavior, participating in post-incident analysis, and addressing follow-up actions to improve reliability.
- Contributed to frontend architecture discussions, introducing and advocating for patterns that were adopted and reused across the engineering team.
- Mentored junior engineers through code reviews and pair programming sessions, ensuring adherence to best practices and fostering a collaborative development environment.
- Containerized frontend services using **Docker** and deployed them to a managed cloud environment, establishing CI/CD pipelines for automated builds and releases.

SKILLS

Frontend Technologies – React, TypeScript, HTML5, CSS3, JavaScript

AI & ML Tools – Claude Code, AI Coding Agents, Prompt Engineering, AI Harness Engineering

Development Practices – Agile Methodologies, Scrum, Code Reviews, CI/CD, TDD, Unit Testing, Integration Testing

Backend & Cloud – Node.js, NestJS, PostgreSQL, AWS, Docker, Kubernetes

Design & Architecture – UI/UX Design Principles, State Management, Design Documentation, ADRs

PROJECTS

Enterprise Legal Spend Management Platform Enhancement

- Developed and iterated on core frontend features for a legal spend management platform using **React** and **TypeScript**, focusing on improving data visualization for financial operations.
- Integrated asynchronous data fetching patterns to ensure a responsive user experience while handling large datasets from backend APIs, achieving a **30% reduction** in perceived load times for key reports.
- Collaborated with product managers to gather user feedback and translate it into refined UI components and workflow improvements, directly impacting feature adoption by key customer segments.

AI-Powered Code Generation Tooling Integration

- Built a proof-of-concept integration demonstrating the use of **AI coding agents** within a development workflow, focusing on templating and scaffolding common frontend components.
- Designed and implemented prompt engineering strategies to elicit more accurate and context-aware code suggestions, reducing manual code writing effort by an estimated **20%** for repetitive tasks.
- Documented best practices for leveraging AI tools and presented findings to the engineering team, contributing to the adoption of AI-assisted development as a core competency.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
