PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Administered warranty claims within the **Tavant Warranty Management System**, ensuring accurate data entry and processing for over **150 claims** per week.
- Reviewed and assessed warranty claims against policy, verifying completeness and accuracy of information related to failure modes and assigning responsibility for **field failures**.
- Developed comprehensive **warranty reports** and channel metrics, identifying trends in claim activity and potential areas for process improvement, contributing to **4 identified optimisation opportunities**.
- Provided technical assessment and reporting on warranty claims, performing audits on labour and travel requests for compliance, and communicating adjustments or denials to customers and partners.
- Collaborated with Global Warranty, Quality, and Engineering teams to support consistent processes and participate in reliability reviews, contributing to **3 defect cost liability decisions**.
- Coordinated warranty-system changes, including user acceptance testing and database maintenance, supporting relevant aftermarket programmes such as **SelectCARE**.
- Managed multiple priorities and met customer expectations and service-level agreements by developing clear basic reports and providing guidance on warranty processes to channel partners.

SKILLS

Warranty Management – Tavant Warranty Management System, claim processing, technical assessment, policy review, audit

Reporting & Analytics – Warranty reporting, channel metrics, data analysis, Microsoft Office, data entry

Technical & Engineering – Failure mode analysis, technical judgement, structured problem-solving, industrial equipment knowledge

Process & Improvement – Process improvement, Lean principles, continuous improvement, user acceptance testing (UAT), change management

Communication & Collaboration – Written and verbal communication, customer focus, cross-functional collaboration, training delivery

PROJECTS

Warranty Claim Analysis and Reporting Platform

- Developed a Python-based reporting tool to aggregate and analyze warranty claim data from a simulated Tavant system, identifying common failure modes across **industrial equipment**.
- Constructed interactive dashboards using **Power BI** to visualize claim trends, processing times, and partner performance metrics, enabling stakeholders to make data-informed decisions.
- Implemented automated data validation checks to ensure accuracy and completeness of claim submissions, reducing data entry errors by an estimated **18%**.

Field Failure Data Enhancement for Engineering

- Engineered SQL queries against a PostgreSQL database to extract and enrich field failure data, correlating component failures with operational parameters for **engineering analysis**.
- Automated the generation of weekly summary reports detailing high-impact failure categories and associated costs, supporting **reliability reviews** for product development teams.
- Assisted in the UAT coordination for a system configuration update that improved data flow between the warranty system and the **ERP**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
