PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Translated complex business needs into detailed technical specifications and integration documentation for API-driven systems, ensuring clarity for development and external partner teams.
- Designed and documented REST API integration flows, including data mapping and error handling logic, for cross-platform connectivity between internal financial systems and external partner platforms.
- Collaborated with architects, developers, and external technology partners to define and implement secure system-to-system connectivity and data exchange protocols.
- Developed and executed integration test plans using **Postman**, validating API contracts, data payloads, and authentication mechanisms for new service integrations.
- Analyzed transaction processing workflows and data flows within a financial services operations dashboard to identify integration points and potential bottlenecks.
- Supported the implementation of Host-to-Host (H2H) integrations by defining technical requirements and facilitating communication between internal teams and third-party providers.
- Managed system configuration changes and coordinated User Acceptance Testing (UAT) across interconnected enterprise systems, ensuring smooth deployment and post-go-live support.

SKILLS

API & Integration – REST APIs, JSON, System-to-System Connectivity, API Testing, Postman, SoapUI, Host-to-Host (H2H)

Financial Services – Payments Operations, Transaction Monitoring, Reconciliation Workflows, Financial Systems Integration

Analysis & Documentation – Technical Specifications, Integration Documentation, Requirements Translation, Data Flow Analysis

Development & Testing – Java Spring Boot, Python Scripting, SQL, Git, Jenkins, Agile/Scrum

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

API Integration Framework for Financial Data Exchange

- Developed a reusable framework in **Java Spring Boot** to standardize REST API integrations, enabling secure data exchange between internal banking applications and external payment processors.
- Authored comprehensive API documentation and integration guides for the framework, detailing endpoints, request/response schemas, and authentication methods for partner consumption.
- Implemented robust error handling and logging mechanisms within the framework, reducing integration-related incidents by approximately **18%** and improving diagnostic capabilities.

Technical Specification for Cross-Platform Messaging Service

- Defined detailed technical specifications for a new messaging service designed to facilitate real-time communication between an enterprise ERP system and a customer-facing portal.
- Mapped data structures and transformation rules for messages exchanged via **JSON** payloads, ensuring data integrity across disparate systems.
- Collaborated with front-end and back-end development teams to validate technical designs and ensure adherence to integration requirements, facilitating a smooth UAT phase.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
