HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and validated **Oracle Fusion HCM Time & Labor Fast Formulas**, converting clock-in/out data into payroll-relevant time elements, supporting complex manufacturing shifts and country-specific labor regulations.
- Configured **Time Calculation Rules**, Time Entry Rules, and eligibility conditions within Oracle Fusion HCM Time and Labor to accurately process working hours, shift premiums, and overtime.
- Adapted and reused **Oracle seeded formulas** and existing customer-developed calculations, ensuring consistency and efficiency in time processing logic for international deployments.
- Applied **generative AI tools**, including Claude and Oracle's Fusion Applications Skills Repository, to accelerate Fast Formula development and troubleshooting, rigorously reviewing AI-generated code for accuracy.
- Executed comprehensive **unit tests** for Fast Formulas, covering standard scenarios, boundary conditions, and exceptions to guarantee reliable calculations and accurate downstream payroll processing.
- Collaborated proactively with international project teams to clarify technical requirements, troubleshoot issues, and document formula logic, testing evidence, and delivery progress within short development cycles.
- Containerized Java Spring Boot services using **Docker** and deployed them to an AWS EKS cluster, managing Helm chart configurations and resource limits for predictable rollouts.

SKILLS

Oracle Fusion HCM – Time & Labor, Fast Formulas, Time Calculation Rules, Time Entry Rules, Time Categories, Time Consumer Sets, Eligibility Conditions

Development Tools – Claude, Oracle Fusion Applications Skills Repository, Jenkins, Git, Jira, Confluence

Programming Languages – Java, Spring Boot, Python, SQL, PL/SQL, Shell Scripting

Databases – PostgreSQL, MySQL, Oracle

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Methodologies – Agile, Scrum, Unit Testing, Change Management

PROJECTS

Oracle Time Calculation Formula Development (HCL Technologies)

- Developed and tested **Fast Formulas** for a financial services client's payroll system, handling complex shift premiums, overtime, and weekend work calculations.
- Converted raw time card entries into structured **payroll-relevant elements**, ensuring data integrity for downstream processing and reconciliation workflows.
- Documented formula logic and testing evidence for a critical component of the payments operations dashboard, supporting audit trail requirements.

Automated Data Integration for Financial Operations (HCL Technologies)

- Engineered **Python scripts** to automate the extraction, transformation, and loading (ETL) of transaction data from multiple sources into a central PostgreSQL database.
- Developed scheduled reporting mechanisms using Python and SQL to provide daily operational summaries for the financial services dashboard, impacting an 8-person operations team.
- Implemented REST APIs using **Java Spring Boot** for cross-system data exchange, facilitating seamless integration between the enterprise ERP and the payments monitoring platform.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
