HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and maintained **production environments** on AWS EC2 instances, responding to critical alerts from **Splunk** and **Dynatrace** to resolve P1/P2 incidents within SLA.
- Automated data extraction and reporting tasks using **Python** scripting, developing ETL pipelines that processed approximately **50,000 records** daily for operational dashboards.
- Developed and debugged **Java Spring Boot** microservices, implementing RESTful APIs for internal system integrations and contributing to feature enhancements.
- Designed and deployed infrastructure configurations as code using **Terraform**, managing resources across AWS regions and ensuring consistent environments for platform deployments.
- Configured and troubleshot **Kubernetes clusters** (EKS), managing deployments, services, and ingress controllers to ensure application availability and scalability.
- Built and maintained CI/CD pipelines using **Jenkins** and **Git**, automating build, test, and deployment processes for over **15 microservices** to staging and production environments.
- Implemented comprehensive **observability** stacks including **Prometheus** for metrics collection and **Grafana** for dashboard visualization, enabling proactive issue detection across customer deployments.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), GCP, Azure

Containerization & Orchestration – Kubernetes, Docker, EKS, Helm

Languages & Scripting – Python, Go, TypeScript, Bash, Java, Spring Boot

Observability & Monitoring – Prometheus, Grafana, Loki, Splunk, Dynatrace

CI/CD & Automation – Jenkins, GitHub Actions, GitLab CI, Ansible, Terraform, Packer

Databases & Storage – PostgreSQL, MySQL, Oracle, Cloud SQL

Operating Systems & Networking – Linux, Linux Networking, Firewalls, DNS, Proxies

PROJECTS

Cloud Platform Deployment Automation

- Engineered a **Terraform**-based IaC solution to provision and manage AWS infrastructure for cloud-native applications, reducing manual setup time by **70%**.
- Developed Python scripts integrated with **Jenkins** to automate the deployment of containerized applications to **Kubernetes** clusters across multiple regions.
- Implemented monitoring and alerting using **Prometheus** and **Grafana** to ensure platform reliability and capture key performance indicators for over **50 services**.

Production Observability Stack Implementation

- Designed and deployed a centralized logging solution using **Loki** and **Grafana** for a fleet of **100+ servers**, aggregating logs from diverse applications.
- Configured **Prometheus** exporters and alert rules to capture system and application metrics, enabling proactive identification of potential performance bottlenecks.
- Developed custom dashboard views in **Grafana** to provide engineering teams with real-time insights into application health and infrastructure status.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
