HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot REST APIs** for core backend services, facilitating seamless interaction between user requests and product catalog data, processing approximately **1.2 billion requests** daily during peak periods.
- Developed and maintained **highly available, distributed systems** responsible for processing large volumes of e-commerce search and discovery requests, ensuring exceptional performance and reliability across the platform.
- Collaborated with senior engineers to develop scalable solutions supporting interactions between user requests, customer product catalogs, and **AI-driven shopping experiences**, contributing to platform speed and scalability.
- Contributed to the design and deployment automation of **mission-critical infrastructure**, including capacity planning and production operations for a global e-commerce search and discovery platform.
- Monitored, troubleshot, and improved system performance, availability, and resilience across distributed environments using **Prometheus** and **Grafana**, reducing critical incidents by **18%**.
- Wrote and reviewed code for performance-critical application logic and infrastructure systems, participating in **sprint planning** and providing technical estimations for new feature development.
- Containerized backend services using **Docker** and deployed them to **AWS EKS**, managing configurations and ensuring predictable rollouts for the core platform.

SKILLS

Languages – Java, Python, Rust, C++

Cloud Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, EKS

Backend Frameworks – Spring Boot, REST APIs

Databases – PostgreSQL, MySQL, Oracle

CI/CD & Observability – Jenkins, GitHub Actions, Prometheus, Grafana, Docker

Methodologies – Agile, Scrum

PROJECTS

Scalable E-commerce Search Backend (HCL Technologies)

- Engineered a **Java Spring Boot microservice** to handle high-volume search queries for an e-commerce platform, processing up to **500,000 requests per minute**.
- Implemented efficient data retrieval mechanisms from a **PostgreSQL** database, optimizing query performance to reduce average response times by **30%**.
- Developed RESTful APIs for product catalog integration, enabling dynamic updates and ensuring data consistency across the search infrastructure.

Distributed System Performance Optimization (MSc Project)

- Designed and simulated a distributed system architecture in Python to model high-traffic scenarios, analyzing latency and throughput under varying load conditions.
- Applied **algorithms and data structures** to optimize data processing workflows, achieving a **22% improvement** in processing speed for simulated user requests.
- Utilized **AWS EC2** instances for simulation environments, gaining practical experience in cloud-based distributed system deployment and management.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
