HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot** microservices for payment processing, implementing **RESTful APIs** and ensuring seamless integration with upstream and downstream systems.
- Engineered **event-driven services** using **Apache Kafka** and **Spring WebFlux**, processing high-volume transaction streams and enabling real-time updates for payment status.
- Contributed to secure, resilient payment application development, focusing on **transaction lifecycle** management, authorization flows, and supporting reconciliation workflows.
- Implemented comprehensive automated testing strategies, including **unit tests** and **integration tests**, achieving over **85% code coverage** for critical payment modules.
- Participated in **code reviews** and **sprint planning** sessions, providing technical estimations and mentoring junior engineers on best practices for **Java** development.
- Supported production services by investigating incidents, performing **root-cause analysis**, and implementing corrective actions to enhance system stability and performance.
- Deployed and operated **cloud-native applications** on **AWS**, leveraging services like **EKS** and **Lambda** for scalable and resilient payment processing infrastructure.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Spring WebFlux, Project Reactor, Apache Kafka, pandas, NumPy, scikit-learn

Cloud Platforms – AWS (EC2, S3, Lambda, EKS, API Gateway, SQS, SNS, CloudWatch, IAM), Docker, Kubernetes

Databases – PostgreSQL, MySQL, Oracle, DynamoDB, RDS

Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile, Scrum, CI/CD, Automated Testing, Code Reviews, Observability

Domain Knowledge – Payment Systems, Financial Transaction Processing, Transaction Lifecycle, Authorization, Settlement, Reconciliation, Exception Handling, Application Security, Regulatory Considerations

PROJECTS

Event-Driven Payments Processing Engine (HCL Technologies)

- Developed a **Java Spring Boot** application to ingest and process payment transaction messages from various sources, integrating with **Apache Kafka** for asynchronous communication.
- Designed and implemented fault-tolerant consumers to handle message replay and ensure exactly-once processing semantics, supporting a **transaction monitoring** workflow for over **2,000 transactions per hour**.
- Built **RESTful APIs** for querying transaction status and integrating with a downstream reconciliation service, contributing to operational alerting and exception handling.

AWS Cloud-Native Payment Gateway Service (HCL Technologies)

- Architected and deployed a **cloud-native payment gateway** service on **AWS** using **Docker** and **Kubernetes (EKS)**, ensuring high availability and scalability.
- Implemented secure API endpoints using **Spring Boot** and integrated with **AWS IAM** and **Secrets Manager** for robust security and credential management.
- Configured **AWS CloudWatch** for comprehensive monitoring and alerting on service health, transaction throughput, and latency, maintaining service level objectives.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
