## PROFESSIONAL EXPERIENCE — 3.5 YEARS

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Investigated and resolved technical faults across **ERP systems** and interconnected applications, tracing issues through logs and database records to identify root causes for a financial-services client.
- Performed **API testing and troubleshooting** using **Postman**, analyzing requests, responses, and authentication errors to diagnose integration failures between internal systems and external partners.
- Wrote complex **SQL queries**, including joins and subqueries, to investigate failed transactions and reconcile data discrepancies within production databases, ensuring data integrity.
- Managed technical incidents from initial report to resolution, coordinating with internal development teams and external vendors, and maintaining clear communication with users on progress and findings.
- Developed **Python scripts** to automate data extraction and reporting tasks, streamlining the generation of operational summaries for enterprise business systems.
- Participated in **Agile/Scrum ceremonies**, including sprint planning and daily stand-ups, contributing to technical estimations and defect tracking within Jira.
- Containerised **Java Spring Boot** applications using **Docker** for consistent deployment across development and production environments on **AWS EC2**.

## SKILLS

**ERP Support** – ERP application support, Technical fault diagnosis, Incident management, Change management, UAT coordination

**Databases & SQL** – SQL, PostgreSQL, MySQL, Oracle, Joins, Subqueries, Data reconciliation, Database records

**APIs & Integrations** – REST APIs, SOAP APIs, API testing, Postman, JSON, XML, Client integrations, Interconnected systems

**Programming & Scripting** – Java, Spring Boot, Python, Shell scripting

**Cloud & DevOps** – AWS, EC2, Docker, Jenkins, Git, CI/CD

**Monitoring & Logging** – Application logs, Splunk, CloudWatch, Dynatrace

**Tools & Methodologies** – Jira, Confluence, Agile, Scrum

## PROJECTS

### ERP Integration Issue Resolution

- Diagnosed and resolved technical integration issues between an **ERP system** and client-facing applications by analyzing **API responses** and tracing data flows through **SQL database records**.
- Developed **Python scripts** to parse and validate data payloads exchanged via **REST APIs**, identifying common error patterns and reducing manual triage time by **~20%**.
- Documented root causes and implemented fixes for recurring integration faults, contributing to a knowledge base used by the support and development teams.

### Automated Transaction Reconciliation Workflow

- Engineered a **Python**-based workflow to automate the reconciliation of transaction data between an enterprise system and a financial operations dashboard, processing approximately **5,000 records** daily.
- Wrote **SQL queries** against **PostgreSQL** to extract and compare transaction details, identifying discrepancies and generating exception reports for further investigation.
- Collaborated with business analysts to refine reconciliation rules and improve the accuracy of automated matching, reducing manual review effort by **~30%**.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
