HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and operated **multi-tenant telemetry ingestion pipelines** on AWS, processing over **10 petabytes of data daily** to underpin observability across critical cloud services.
- Developed and enhanced **APIs and subsystems** for telemetry collection, routing, and storage, enabling efficient real-time data access for analytics and monitoring.
- Integrated **machine learning-based anomaly detection** into the observability platform, improving the accuracy of real-time signal processing and insight generation.
- Owned core components of the ingestion and observability platform, leading continuous improvements in **reliability, scalability, and performance** for global-scale systems.
- Implemented **robust monitoring and alerting** using Dynatrace and Splunk, ensuring production services maintained high availability and facilitating rapid incident response.
- Collaborated with partner teams to deliver end-to-end observability solutions, contributing to the design and implementation of **new platform features** for internal and external customers.
- Containerized telemetry services using **Docker** and managed deployments on **AWS EC2 instances**, ensuring consistent operational environments and facilitating CI/CD workflows via Jenkins.

SKILLS

Cloud Platforms – Azure, AWS, Google Cloud

Data Ingestion & Processing – Real-time analytics, Batch processing, Telemetry, Data pipelines, ETL

Observability & Monitoring – Splunk, Dynatrace, CloudWatch, Monitoring, Alerting, Diagnostics

Programming Languages – Java, Python, SQL, TypeScript

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, NestJS

Databases & Storage – PostgreSQL, Azure Cosmos DB, Azure SQL DB, Azure Data Factory, Azure Synapse Analytics

Containerization & Orchestration – Docker, Kubernetes, AKS

PROJECTS

Enterprise Telemetry Ingestion Platform (HCL Technologies)

- Engineered a high-throughput **Java Spring Boot** service to ingest and process millions of daily operational events from enterprise applications.
- Implemented **Hibernate** for efficient data persistence to PostgreSQL, managing schema evolution and ensuring data integrity for critical logs.
- Designed and deployed the service on **AWS EC2** instances, integrating with **Jenkins** for automated build and deployment pipelines.

Real-time Anomaly Detection Service (MSc Applied Project)

- Developed a **Python**-based service using **scikit-learn** to identify anomalous patterns in time-series data, achieving **~0.88 AUC** on a simulated dataset.
- Built data processing pipelines with **pandas** and **NumPy** to prepare large volumes of streaming data for model inference.
- Deployed the service as a REST API using **FastAPI**, enabling integration with downstream analytics dashboards and alerting systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
