HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **frontend interfaces** and **backend services** for new software applications, implementing business logic and user interactions on a **Python** stack.
- Built and maintained **relational databases** and **APIs**, supporting the storage, retrieval, updating, import, and export of immigration-related information using **SQL**.
- Integrated **AI models** and third-party services into applications for document processing and workflow automation, specifically focusing on **Python**-based AI integrations.
- Implemented business rules, validation checks, and user permissions for a client-facing application, contributing to a more streamlined user experience and automated workflow.
- Collaborated with technical and immigration specialists to clarify requirements, translating complex business processes into practical software solutions within an Agile framework.
- Tested applications, investigated bugs, and improved performance and reliability, with a focus on debugging and enhancing existing codebases, including AI-generated outputs.
- Containerized backend services using **Docker** and deployed them to a local environment, ensuring consistent functionality and simplifying updates for desktop applications.

SKILLS

Programming Languages – Python, JavaScript, TypeScript, SQL

Backend Development – Spring Boot, REST APIs, Java, Flask, FastAPI

AI & Machine Learning – AI Models, AI APIs, Machine Learning Fundamentals, scikit-learn

Databases & Storage – Relational Databases, PostgreSQL, MySQL, Oracle, Local Storage, Cloud Storage

Cloud & DevOps – AWS, Docker, Git, Jenkins, CI/CD

Tools & Methodologies – Jira, Confluence, Agile, Scrum, APIs

PROJECTS

AI-Powered Document Processing for Immigration

- Developed a **Python** application to automate the processing of immigration documents, integrating an **AI model** for information extraction and validation.
- Built a **FastAPI** backend to serve the AI model's inference requests, handling document uploads via a REST API and returning structured data for further processing.
- Implemented data persistence using **PostgreSQL** to store extracted information and manage document processing workflows, ensuring data integrity and security.

Client Onboarding Portal with Automated Workflows

- Designed and built a **web application** frontend with **React** and **TypeScript** for client onboarding, allowing users to submit required information through interactive forms.
- Developed **backend services** in **Python** to manage user data, implement validation checks, and trigger automated workflow steps based on submitted information.
- Integrated with a third-party **API** for identity verification, enhancing the security and reliability of the client onboarding process.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
