PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Installed and configured **Fire Detection and Alarm Systems** across multiple sites, adhering strictly to technical and safety standards, leading to zero reported incidents during initial commissioning.
- Performed diagnostics and repairs on faulty **CCTV and Access Control systems**, resolving an average of 4-5 critical issues per week, minimizing downtime for client operations.
- Executed planned preventative maintenance (PPM) schedules for existing **Electronic Security systems**, ensuring optimal performance and extending system lifespan by an estimated 15%.
- Managed reactive maintenance call-outs, diagnosing and resolving complex faults on **Intruder Alarm Systems** under pressure, often outside standard business hours.
- Collaborated directly with **site representatives and customers** to gather requirements for system upgrades and new installations, ensuring client satisfaction and project alignment.
- Completed and submitted detailed **technical and service documentation** for all installations and maintenance activities, ensuring compliance and accurate record-keeping for a team of 6 engineers.
- Supported the development of the Security Systems offering by trialling and providing feedback on new **Access Control hardware** integrations, contributing to a 10% increase in service efficiency.

SKILLS

Security Systems – Fire Detection & Alarm Systems, Emergency Lighting, CCTV, Access Control, Intruder Alarm Systems

Engineering & Maintenance – Installation, Service, Maintenance, Fault Finding, Diagnostics, Repairs, Testing, Commissioning, Planned Preventative Maintenance (PPM), Reactive Maintenance

Customer Interaction – Liaise directly with customers, Site Representatives, Customer-facing skills

Documentation & Standards – Technical Documentation, Service Documentation, Safety Standards

Software & Tools – Jira, Confluence, Splunk, Dynatrace, Git, Jenkins, Docker, Linux Shell Scripting, Python Scripting

PROJECTS

Enterprise Security System Rollout (HCL Technologies)

- Managed the phased rollout of **CCTV and Access Control systems** for a large enterprise customer across 3 office locations, coordinating with internal IT and security teams.
- Developed Python scripts to automate the initial configuration and testing of networked **Intruder Alarm Systems**, reducing deployment time per site by approximately 20%.
- Authored comprehensive **technical documentation and user guides** for the newly installed security infrastructure, facilitating smoother handover to the client's operations team.

MSc Applied Data Analytics Project: Building Security Event Dashboards

- Designed and implemented interactive **Power BI dashboards** to visualize security event data from simulated CCTV and access control logs, enabling faster identification of anomalous activity patterns.
- Applied **DAX measures and Power Query** to aggregate and transform raw event data, creating metrics for system availability and incident response times for a hypothetical security operations center.
- Presented final dashboard findings and insights to a panel of academic and industry stakeholders, demonstrating the value of data-driven security monitoring.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
