PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the global deployment and ongoing operations of **Rubrik Enterprise Edition** across four regions, overseeing approximately **2,000 VMs** and petabytes of data for critical healthcare systems.
- Automated **Red Hat Linux** system administration tasks, including patching and configuration management, for a large estate of over 1,500 servers using **Ansible Automation**.
- Implemented and enforced data protection policies, including **retention, immutability, and access control**, to meet stringent RPO and RTO targets for disaster recovery scenarios.
- Responded to and resolved infrastructure incidents, performing root cause analysis and implementing corrective actions within defined SLA timelines for production systems.
- Coordinated change management processes for infrastructure updates, ensuring thorough testing and minimal disruption to ongoing operations across the data platform.
- Developed and maintained production runbooks and operational documentation for infrastructure services, facilitating knowledge transfer within the team and supporting incident response.
- Containerized internal tooling and deployed them to a **Kubernetes** cluster on **AWS EKS**, managing Helm chart configurations and basic resource allocation.

SKILLS

Data Protection – Rubrik Enterprise Edition, Backup and Recovery, Retention, Immutability, Encryption, Access Control, RPO, RTO, Disaster Recovery, Cyber Recovery, Ransomware Resilience

Operating Systems – Red Hat Linux, Linux, Windows Server

Automation & Orchestration – Red Hat Ansible Automation, Scripting

Infrastructure Platforms – Nutanix, Dell PowerFlex, VMware

Cloud & Containerization – AWS, Kubernetes, Docker, AWS EKS

Operations Management – Incident Management, Change Management, Problem Management, SLA Management, Production Support, Monitoring

PROJECTS

Global Rubrik Deployment & Automation Initiative

- Designed and deployed **Rubrik Enterprise Edition** as the standard backup and data protection platform across four distinct geographic regions, managing configurations for **petabyte-scale** storage.
- Automated the provisioning and configuration of new Rubrik nodes and SLA domains using **Ansible Automation**, reducing deployment time for new regional sites by **40%**.
- Developed custom scripts to monitor backup job success rates and storage utilization, integrating with internal alerting systems to proactively address potential issues.

Enterprise Linux Infrastructure Hardening

- Implemented security hardening standards on over **1,500 Red Hat Linux** servers, configuring kernel parameters, disabling unnecessary services, and enforcing access controls.
- Automated the deployment of security patches and configuration updates using **Red Hat Satellite** and **Ansible**, ensuring compliance with internal security policies and reducing manual effort by **60%**.
- Integrated system logs from hardened Linux servers into a central **Splunk** instance for real-time security monitoring and audit trail analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
