HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered Python scripts to automate data extraction and transformation tasks, reducing manual processing time for weekly reports by an average of **18 hours**.
- Developed and maintained Java Spring Boot REST APIs for core business systems, supporting integration between disparate enterprise platforms.
- Managed production support for enterprise applications, resolving P1/P2 incidents and ensuring adherence to strict SLAs using **Splunk** and **Dynatrace** for monitoring.
- Reviewed and analyzed engine documentation, including remaining life information and airworthiness limitations, to determine maintenance requirements for lease transitions.
- Collaborated with cross-functional teams, including operations and business analysts, to review, cleanse, and accept engine documentation, ensuring accuracy and completeness.
- Developed and designed database upgrades for the primary engine data processing system, enhancing process quality and data integrity.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and reducing setup time.

SKILLS

Languages – Java, Python, SQL, R, Linux Shell Scripting

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools/Observability – Splunk, Dynatrace, Jira, Confluence, MS Excel, MS Outlook

Data Analysis/BI – Power BI, Tableau, DAX, Power Query, Data Modelling

PROJECTS

Automated Aviation Records Processing System

- Developed a Python application to parse and validate aviation engine records, including remaining life data and service bulletin status, reducing document review time by approximately **30%**.
- Integrated the system with a PostgreSQL database to store and query processed engine data, enabling faster retrieval for technical condition assessments.
- Designed and implemented RESTful APIs using Flask to allow other internal systems to access processed engine documentation, streamlining data sharing across teams.

Engine Maintenance Data Analysis Dashboard

- Created interactive dashboards in **Power BI** to visualize key engine maintenance data and technical fleet status for stakeholders, facilitating informed decision-making.
- Developed complex DAX measures and Power Query transformations to aggregate and analyze data from multiple sources, providing insights into engine performance trends.
- Collaborated with technical records teams to gather requirements and refine dashboard visualizations, ensuring alignment with operational needs and regulatory awareness.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
