PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Translated complex customer business problems into scalable, multi-tier solution architectures spanning frontend, backend, data, and AI layers for SMB accounts, earning C-level trust through technical credibility.
- Developed and deployed **LLM-powered agents** and **RAG pipelines** for customer-facing prototypes, incorporating production-grade safety, governance, and observability practices.
- Architected and built end-to-end **Python prototypes** that evolved into production assets, demonstrating comfort in codebases and accelerating iteration cycles with AI coding tools.
- Collaborated with enterprise customers to gather technical requirements, translating business needs into actionable solution designs and technical roadmaps for engineering teams.
- Codified working patterns into reusable blueprints and enablement assets, turning individual customer wins into accelerators for broader adoption and scaling knowledge across the team.
- Participated in **Agile ceremonies** and technical estimation sessions, providing detailed input on sprint planning and contributing to the team's delivery velocity.
- Containerized and deployed **Python applications** and AI services to **Kubernetes clusters** on AWS, managing configurations and resource allocation for predictable performance.

SKILLS

AI/ML – LLM Agents, RAG Pipelines, Prompt Engineering, Evaluation Frameworks, AI-Native Workflows, Production Safety, Governance, Reliability, Observability

Languages – Python, English (C2/Native), German (C2/Native)

Cloud & DevOps – AWS, Kubernetes, Docker, CI/CD, Terraform, EKS

Backend & Data – SQL, REST APIs, GraphQL APIs, Relational Databases, PostgreSQL, Node.js, Java

Frontend – JavaScript, TypeScript, HTML, CSS

Tools & Platforms – Salesforce, OpenAI API, Claude API, Snowflake, Databricks, BigQuery, Tableau, Looker, Power BI, PagerDuty, Datadog, Grafana

Methodologies – Agile, Scrum, Solution Architecture, Technical Advising, Executive Communication

PROJECTS

AI-Powered Customer Onboarding Solution (HCL Technologies)

- Developed a **Python-based prototype** for an AI-driven customer onboarding experience, integrating with a **vector database** to provide context-aware assistance during initial setup.
- Built **RAG pipelines** to ground the AI agent with customer-specific documentation, improving response accuracy by **30%** in pilot testing scenarios.
- Designed and documented reusable patterns for AI agent integration, enabling faster onboarding for subsequent enterprise customers and reducing initial setup time by approximately **20%**.

Scalable Backend Service for Agent Orchestration (HCL Technologies)

- Engineered a **Java Spring Boot** backend service to orchestrate multiple AI agents and external APIs, handling complex workflows and ensuring reliable execution.
- Implemented **RESTful APIs** for seamless integration with frontend applications and internal systems, managing request validation and error handling for improved stability.
- Containerized the service using **Docker** and deployed it onto an **AWS EC2** instance, establishing basic CI/CD pipelines with Jenkins for automated builds and deployments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
