HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot REST APIs** to support new feature development for enterprise applications, ensuring seamless data exchange across internal services.
- Developed and maintained **Hibernate** mappings and performed **SQL** queries for data persistence and retrieval across PostgreSQL and Oracle databases, supporting complex business logic.
- Authored **JUnit** test cases and employed **Mockito** for unit testing Java components, achieving over 85% code coverage for critical application modules.
- Collaborated with clients and internal teams to translate user and business needs into clear requirements and actionable delivery plans, contributing to a focused backlog.
- Designed, built, and tested **software and data-enabled solutions**, adhering to secure engineering practices and quality governance standards relevant to client projects.
- Contributed to the development and improvement of **digital offers and reusable approaches**, drawing on project experience and user feedback to enhance team methodologies.
- Containerised backend services using **Docker** and deployed to **AWS EC2** instances, managing configuration and basic resource allocation for predictable rollouts.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Hibernate, JPA, JUnit, Mockito, Maven, Gradle

Data & Analytics – SQL, PostgreSQL, MySQL, Oracle, Power BI, DAX, Power Query, Tableau, R, RStudio, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD

Methodologies & Tools – Agile, Scrum, Jira, Confluence, Linux, Shell Scripting, API Design

Domain Knowledge – Software Engineering, Data Analytics, Product Ownership, Client-Facing Project Delivery, Multidisciplinary Project Coordination

PROJECTS

Enterprise Java Application Modernisation

- Refactored legacy Java components into a modern **Spring Boot** microservice architecture, improving system modularity and maintainability.
- Implemented **Hibernate** for ORM, streamlining database interactions with PostgreSQL and reducing boilerplate code for data access layers.
- Developed comprehensive **JUnit** and integration tests, increasing overall application stability and reducing post-deployment defects by approximately 30%.

Client Requirements Translation & Solution Design

- Engaged with stakeholders from a financial services client to gather requirements for a new transaction monitoring dashboard, translating complex needs into technical specifications.
- Designed a data pipeline using **Python** and **SQL** to ingest and process transaction data, enabling real-time operational alerting and reconciliation workflows.
- Collaborated with client operations teams to refine UI mockups and validate proposed solutions through UAT, ensuring alignment with business objectives.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
