PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Served as the primary technical point of contact for a portfolio of **aircraft modification projects**, translating customer needs into actionable engineering plans and ensuring alignment with programme objectives.
- Managed project technical risks, issues, and opportunities by identifying key technical risks and developing comprehensive mitigation strategies, presenting findings in regular project health status reports.
- Collaborated with customers, **outside vendors**, and regulatory agencies to develop safe, compliant, and practical engineering solutions for aircraft modification programs, exceeding customer expectations on time and within budget.
- Provided technical support and independent advice to Project Managers, contributing to the design and certification of commercial aircraft modification solutions such as **cabin interior changes** and IFE upgrades.
- Chaired technical review meetings, including ITCM, PDR, and CDR sessions, ensuring adherence to engineering standards and facilitating decision-making processes across **cross-functional teams**.
- Supported functional engineering managers in resource planning and assignment for modification projects, contributing to the efficient allocation of technical expertise across multiple concurrent programs.
- Containerised multiple Java Spring Boot microservices using **Docker** and deployed them to an **AWS EC2** environment, managing build and deployment pipelines via **Jenkins** for consistent application delivery.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Languages – Java, Python, SQL, R, English

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Tools/Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, PostgreSQL, MySQL, Oracle, Power BI, Tableau

Methodologies – Agile, Scrum, CI/CD, Change Management

Domain Knowledge – Aircraft Modification, Commercial Aircraft Interiors, Regulatory Compliance (EASA, CFR Part 25), Technical Risk Management, Project Engineering

PROJECTS

Aircraft Modification Technical Design and Certification

- Led the technical design phase for a major aircraft interior modification project, integrating new cabin systems and ensuring compliance with **CS-25 airworthiness requirements**.
- Developed and executed test plans for the modified aircraft systems, coordinating with **external vendors** and MROs to validate performance and safety standards.
- Authored comprehensive technical documentation and certification reports for submission to regulatory bodies, detailing engineering solutions and risk mitigation strategies.

Enterprise Systems Integration and Support

- Engineered **REST APIs** using Java Spring Boot to facilitate data exchange between the core ERP system and a new operational platform, supporting cross-system integrations for a financial-services client.
- Developed Python scripts to automate data validation and ETL processes, migrating and transforming approximately **50,000 transaction records** weekly across PostgreSQL and Oracle databases.
- Managed change control processes for system configuration updates, coordinating UAT and providing post-go-live support for interconnected enterprise business systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
