

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed scalable Java Spring Boot microservices for network configuration lifecycle management, integrating with PostgreSQL for persistent storage.
- Engineered Python scripts to automate data ingestion and ETL processes for network telemetry, reducing manual data preparation time by **40%**.
- Implemented and maintained CI/CD pipelines using **Jenkins** and **Git** for consistent and reliable software deployments to AWS.
- Collaborated with peer engineers to define and implement service-oriented architectures (SOA) for distributed network management systems.
- Participated in code reviews and sprint planning sessions, contributing to technical estimations and architectural discussions for new feature development.
- Managed production support for enterprise applications, responding to P1/P2 incidents and ensuring adherence to strict service level agreements (SLAs) within a **Linux** environment.
- Containerized Java applications using **Docker** and deployed them onto AWS EC2 instances, managing configurations and resource allocation.

SKILLS

Cloud Computing – AWS, EC2, S3, Lambda, CloudWatch

Programming Languages – Java, Python, SQL, Linux Shell Scripting

Frameworks & Libraries – Spring Boot, Hibernate, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Docker, Jenkins, Git, Jira, Confluence

Networking Concepts – Software Defined Networking (SDN), Distributed Systems, SOA

Observability & Monitoring – Splunk, Dynatrace

PROJECTS

Network Entity Reservation Service (HCL Technologies)

- Developed a **Java Spring Boot** service to manage the reservation of network entities for procurement activities, ensuring capacity planning alignment.
- Designed REST APIs for seamless integration with upstream automation systems and downstream network provisioning tools, improving data flow efficiency.
- Implemented robust error handling and logging mechanisms using **Spring Boot Actuator** and **Logback**, enabling detailed monitoring of service operations.

Automated Network Telemetry Processing (HCL Technologies)

- Created Python scripts leveraging **pandas** to parse and transform large volumes of network telemetry data from diverse sources.
- Developed data pipelines to aggregate and validate network metrics, preparing them for analysis and ingestion into monitoring platforms.
- Integrated the Python scripts into a scheduled job using **cron** on a Linux server, ensuring timely data availability for operational insights.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
