

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot microservices** for core platform functionality, focusing on building scalable, high-performance backend systems, processing approximately **4,500 requests per second** during peak loads.
- Implemented robust persistence layers using **Hibernate and JPA**, managing complex object-relational mappings and ensuring data integrity for critical platform data stores.
- Designed and implemented RESTful APIs using **Spring Boot**, facilitating seamless integration between backend services and frontend applications, and supporting cross-service communication.
- Contributed to code reviews and technical estimations within an **Agile/Scrum** framework, ensuring adherence to coding standards and project timelines for a team of **8 engineers**.
- Collaborated with product managers and design teams to translate business requirements into technical specifications, ensuring alignment between product vision and engineering execution.
- Gained exposure to **NoSQL database concepts** and their application in distributed systems for enhanced data processing capabilities.
- Containerized backend services using **Docker** and deployed them to **AWS Elastic Kubernetes Service (EKS)**, managing configuration and ensuring smooth rollouts.

SKILLS

Languages – Java, Python, SQL, JavaScript

Frameworks/Libraries – Spring Boot, Hibernate, JPA, Spring Cloud, React, Next.js

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Kubernetes, Docker

Databases – PostgreSQL, MySQL, Oracle, NoSQL

Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile, Scrum

Data Processing – Data Pipelines, ETL, Data Modelling

PROJECTS

Distributed Java Backend for Data Processing

- Engineered a distributed system using **Java Spring Boot** and **PostgreSQL** to process large volumes of incoming data streams, handling over **3,000 events per minute**.
- Designed and implemented REST APIs to expose processed data and enable integration with downstream analytics services, ensuring low latency for critical operations.
- Containerized the application using **Docker** and deployed it to a Kubernetes cluster, establishing CI/CD pipelines with **Jenkins** for automated testing and deployment.

Microservice Integration Layer with AWS

- Developed a set of **Java microservices** acting as an integration layer, connecting disparate internal systems via RESTful communication patterns.
- Managed data transformations and validations between services, ensuring consistency and accuracy of data flowing through the platform.
- Deployed services on **AWS EC2** instances, configuring monitoring with **CloudWatch** to track performance and availability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
