

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed scalable **Python** back-end services and **RESTful APIs** supporting a forecasting product, integrating with cloud-based data pipelines.
- Owned the end-to-end lifecycle of a critical software system, from initial design and development through testing, deployment, and ongoing production support.
- Built and optimized **cloud-based data pipelines** on **AWS**, handling the ingestion, transformation, and delivery of large datasets for machine learning colleagues.
- Collaborated with **data scientists** and product managers to define requirements and deliver new features and platform improvements for the forecasting product.
- Implemented **CI/CD pipelines** using **Jenkins** and **Git**, ensuring efficient and reliable deployment of applications to cloud infrastructure.
- Contributed to technical architecture discussions, improving engineering standards and best practices for application development and deployment.
- Containerized microservices using **Docker** and deployed them to a managed **Kubernetes** cluster, configuring resource limits and ensuring stable rollouts.

SKILLS

Languages – Python, Java, SQL, R, JavaScript, TypeScript

Frameworks & Libraries – Spring Boot, Flask, FastAPI, pandas, NumPy, scikit-learn, React, Angular

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, Terraform

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, RStudio

Methodologies – Agile, Scrum, CI/CD, RESTful APIs, System Design

PROJECTS

Python-Based Forecasting Data Pipeline

- Developed a robust **Python** data pipeline on **AWS Lambda** and **S3** to ingest and transform time-series data, supporting the organization's forecasting product.
- Implemented data validation and error handling within the pipeline, reducing data quality issues by an estimated **20%** before downstream consumption.
- Automated pipeline execution using **CloudWatch Events** and **cron jobs**, ensuring timely data availability for machine learning model training and analysis.

Enterprise Java Application Modernization

- Refactored legacy Java services into modular **Spring Boot** microservices, enhancing maintainability and scalability for core enterprise functions.
- Integrated new RESTful APIs using **Spring MVC**, facilitating cross-system data exchange and improving integration capabilities with other business systems.
- Achieved a **35%** reduction in API response times by optimizing database queries and implementing caching strategies using **JPA** and **Hibernate**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
