

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, building REST APIs for inter-service communication and handling approximately **4,500 requests per second** during peak loads.
- Implemented persistence layers using **Hibernate** and **JPA**, managing entity relationships and optimizing database interactions for an enterprise ERP integration module.
- Wrote unit and integration tests using **JUnit** and **Mockito**, achieving over **85% code coverage** for critical Java components and ensuring code quality.
- Contributed to the design and development of scalable software systems, actively participating in **code reviews** and technical discussions to ensure adherence to best practices.
- Debugged and resolved complex issues in both **production** and development environments, collaborating with cross-functional teams to identify root causes and implement timely fixes.
- Gained exposure to cloud infrastructure by deploying containerized applications using **Docker** on **AWS EC2** instances and managing application logs via **CloudWatch**.
- Participated in **Agile/Scrum ceremonies**, including sprint planning and daily stand-ups, providing technical estimations and contributing to team velocity.

SKILLS

Programming Languages – Python, Java, Go, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

DevOps & Tools – Docker, Git, Jenkins, Jira, Confluence, Splunk, Dynatrace

Databases – PostgreSQL, MySQL, Oracle

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing

Methodologies – Agile, Scrum

PROJECTS

Enterprise Java Application Performance Enhancement

- Optimized a high-throughput **Java Spring Boot** application by refactoring critical code paths and improving database query efficiency, reducing average response times by **30%**.
- Implemented asynchronous processing using **JPA** and a message queue (simulated with in-memory queues for project scope) to handle background tasks without blocking main application threads.
- Containerized the Java application using **Docker** for consistent deployment across development and staging environments, integrating with a simulated **Jenkins** pipeline.

Python-Based Data Ingestion and Validation Service

- Developed a **Python** service using **FastAPI** to ingest and validate structured data from various sources, processing approximately **2,000 records per hour**.
- Implemented data quality checks and error handling routines using **pandas** to ensure data integrity before it was passed to downstream systems.
- Integrated with a **PostgreSQL** database to store processed data and log validation errors, providing an audit trail for ingested information.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
