+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for enterprise systems, handling over **1,500 requests per minute** during peak loads.
- Implemented data extraction and transformation logic using **Python scripting** and **pandas** to support scheduled financial reporting, processing approximately **50,000 records** daily.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within strict SLA targets, reducing critical P1 incidents by **15%** over six months.
- Collaborated with business analysts and operations teams to gather requirements for a financial-services dashboard, translating needs into actionable development tasks within an Agile framework.
- Designed and executed SQL queries across **PostgreSQL** and **Oracle** databases for data validation and ad-hoc reporting, supporting change management processes for system configuration updates.
- Containerized multiple Java applications using **Docker**, enabling consistent deployment across development, staging, and production environments on **AWS EC2**.
- Authored comprehensive technical documentation and runbooks for production support procedures, which were adopted by the customer onboarding team to streamline new client integrations.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Hibernate, JPA, Microservices, JUnit, Maven, Python, Flask, FastAPI

Databases – SQL, PostgreSQL, MySQL, Oracle, Data Warehousing, Data Modelling

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, RStudio, pandas, NumPy, scikit-learn, Statistical Analysis, A/B Testing

Enterprise Systems & Support – ERP Integration, Production Support, Incident Management, SLA Management, Change Management, Jira, Confluence, Splunk, Dynatrace, Linux

PROJECTS

Financial Operations Dashboard Enhancement

- Enhanced a **payments operations dashboard** for a financial-services client by building new Java Spring Boot modules to monitor transaction flows and provide real-time operational alerting for failed messages.
- Developed **Python scripts** to automate the aggregation of system logs from Splunk and Dynatrace into a unified reporting format, reducing manual data compilation time by **40%** for the operations team.
- Implemented robust data validation checks using **SQL** and **JPA** to ensure data integrity within the reconciliation workflows displayed on the dashboard.

Automated Reporting and Data Pipeline

- Engineered a Python-based ETL pipeline to ingest data from disparate enterprise systems, transforming and loading it into a central PostgreSQL data warehouse for analytical reporting.
- Constructed interactive **Power BI dashboards** to visualize key performance indicators derived from the data warehouse, presenting actionable insights to business stakeholders and supporting data-driven decision-making.
- Applied **scikit-learn** to build a predictive model on a 50,000-row dataset to forecast potential transaction processing bottlenecks, achieving an RMSE of **12.5**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
