

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed, built, and operated features and services within enterprise-scale infrastructure platforms, contributing across the SDLC from specification through production on **Java Spring Boot**.
- Wrote and reviewed high-quality production code in **Java**, factoring **reliability**, **performance**, **security**, and **cost** into engineering decisions for financial services applications.
- Diagnosed and resolved production problems alongside senior engineers, building end-to-end understanding of services supporting a **payments operations dashboard**.
- Applied AI-native practices across the SDLC, using AI-assisted development and code review to accelerate delivery of new platform features.
- Shared an on-call rotation, responding effectively to production incidents and building **operability** and **observability** into shipped services using **Splunk** and **Dynatrace**.
- Analyzed and improved code and systems for quality, scalability, and efficiency, reducing ad-hoc query execution times by an average of **30%** through strategic indexing and query refactoring in **PostgreSQL**.
- Containerized microservices using **Docker** and deployed them to **AWS EC2** instances, managing configurations and basic resource limits for predictable rollouts.

SKILLS

Languages – Java, Python, SQL, R, Bash

Frameworks/Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux

Databases – PostgreSQL, MySQL, Oracle

Observability/CI/CD – Splunk, Dynatrace, Jenkins, Git

BI/Analytics – Power BI, Tableau, DAX, Power Query

PROJECTS

Enterprise Payments Platform Enhancement (HCL Technologies)

- Engineered **Java Spring Boot** microservices to process and enrich transaction data for a financial-services client's operations dashboard, handling approximately **3,200 events per hour**.
- Developed **SQL scripts** for data validation and schema evolution across PostgreSQL and Oracle databases, ensuring data integrity for critical reconciliation workflows.
- Integrated new alerting mechanisms into the existing platform, reducing manual monitoring effort for the operations team by an estimated **15%**.

Automated Reporting Pipeline (HCL Technologies)

- Built automated **Python** scripts to extract, transform, and load data from multiple enterprise systems into a central reporting database, replacing a manual 4-hour weekly process.
- Designed and implemented ETL jobs using **pandas** and **SQL** to aggregate data for scheduled operational reports, improving report generation speed by **40%**.
- Containerized the reporting pipeline using **Docker** for consistent execution across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
