

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **REST APIs** using **Java Spring Boot** for inter-service communication, handling approximately **1,500 requests per minute** during peak hours.
- Wrote **Python scripts** to automate ETL processes, transforming and loading data from disparate sources into a central data warehouse, reducing manual effort by an estimated **20 hours per week**.
- Managed production incidents for enterprise applications, performing root cause analysis using **Splunk** and **Dynatrace**, and ensuring adherence to strict SLAs for P1 and P2 issues.
- Contributed to the design and implementation of backend services and platform utilities, focusing on **API development** and **database integration**.
- Improved observability by implementing comprehensive logging and monitoring across services, facilitating quicker debugging and issue resolution.
- Collaborated with AI and product teams on shared architecture decisions, ensuring alignment between technical solutions and business objectives.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, improving deployment consistency and reducing setup time.

SKILLS

Languages – Java, Python, SQL, R

Backend Frameworks – Spring Boot, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, pandas, NumPy, scikit-learn

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling

PROJECTS

Enterprise Java Service Integration Platform

- Developed a suite of **Java Spring Boot microservices** to integrate disparate enterprise systems, enabling seamless data flow for core business operations.
- Implemented asynchronous communication patterns using message queues to enhance system resilience and handle fluctuating load, processing over **5,000 messages daily**.
- Wrote comprehensive **JUnit and Mockito tests**, achieving over **85% code coverage** for critical service components and ensuring stability before production deployment.

Automated Data Pipeline for Operational Reporting

- Engineered an end-to-end **Python data pipeline** that ingested data from multiple databases, performed transformations using **pandas**, and generated daily operational reports.
- Designed and implemented the data extraction and transformation logic, reducing the time required to generate key performance indicator reports from **4 hours to 30 minutes**.
- Deployed the pipeline on **AWS Lambda**, integrating with **S3** for data storage and scheduling execution via CloudWatch Events, ensuring reliable and automated data processing.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
