HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained high-availability, massively scaled telemetry collection agents in **Rust** and **Go**, contributing to the core observability platform.
- Designed and implemented complex software solutions to the highest quality for owned services, ensuring reliability and performance at AWS scale.
- Participated in agile team ceremonies, including sprint planning and technical estimation, to deliver features for the CloudWatch platform.
- Engaged with upstream open-source communities, such as **OpenTelemetry**, to integrate and contribute to foundational technologies used in agent development.
- Diagnosed and resolved production issues by diving deep into root cause analysis, implementing fixes that prevent recurrence across millions of users.
- Collaborated with cross-functional teams to define technical requirements and estimate effort for new service features and enhancements.
- Containerized telemetry collection agents using **Docker** and deployed them to a managed **Kubernetes** environment on AWS, ensuring consistent build and runtime.

SKILLS

Languages – Rust, Go, Java, Python, C++, SQL

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Observability Tools – Splunk, Dynatrace, CloudWatch

Containerization & Orchestration – Docker, Kubernetes

CI/CD & Version Control – Jenkins, Git

Methodologies – Agile, Scrum

Data Processing – OpenTelemetry

PROJECTS

CloudWatch Collector Agent Development

- Engineered a new telemetry collector agent in **Rust** for capturing high-resolution metrics, processing approximately 10,000 metric observations per second during peak load.
- Integrated the agent with the **OpenTelemetry** standard for structured data export, ensuring compatibility with existing CloudWatch ingestion pipelines.
- Implemented robust error handling and retry mechanisms, reducing data loss incidents by **40%** compared to the previous batch-oriented approach.

AWS Observability Platform Enhancement

- Developed a Python-based automation script to streamline the deployment and configuration of CloudWatch agents across a fleet of **500+ EC2 instances**.
- Designed and implemented a CI/CD pipeline using **Jenkins** and **Git** for automated testing and deployment of agent updates, cutting deployment time by **30%**.
- Wrote comprehensive technical documentation and runbooks for agent operational procedures, facilitating faster onboarding for new SRE team members.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
