PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and implemented **Java Spring Boot REST APIs** for inter-service communication, supporting an average of 500 requests per minute for core platform features.
- Designed and built a **Hibernate-based persistence layer** to manage complex relational data for enterprise business systems, ensuring data integrity across multiple modules.
- Authored **JUnit and Mockito test suites** for Java applications, achieving over 85% code coverage and identifying critical bugs prior to deployment.
- Contributed to the design and architecture of a new digital platform, focusing on **scalability and maintainability** for a team of 5 engineers.
- Collaborated on the integration of a new **Building Information Modelling (BIM) workflow** into the existing project delivery pipeline, enhancing cross-disciplinary collaboration.
- Participated in sprint planning and **technical estimation** for new feature development, contributing to the successful delivery of 95% of committed backlog items.
- Containerized existing Java applications using **Docker** and deployed them to an **AWS EC2** environment, improving deployment consistency and reducing setup time by 40%.

SKILLS

Architecture & Design – Concept Design, Masterplanning, Detailed Design, Sustainable Design, People-Centred Environments, Parametric Design, AI-Assisted Tools

Digital & BIM – Revit, AutoCAD, Rhino, Adobe Creative Suite, Building Information Modelling (BIM), Collaborative Model-Based Delivery

Technical Skills – Design Analysis, Problem-Solving, Creative Response Development, Freehand Sketching, Digital Sketching

Industry Standards – Irish Construction Standards, Building Regulations, Planning System

Collaboration & Communication – Written Communication, Verbal Communication, Visual Communication, Design Concept Explanation, Multidisciplinary Teamwork, Constructive Feedback

PROJECTS

Digital Design Platform Enhancement (HCL Technologies)

- Engineered **Java Spring Boot microservices** to provide core functionalities for a new digital platform, handling approximately 2,000 daily API calls.
- Implemented a **JPA/Hibernate data access layer** for efficient interaction with PostgreSQL databases, supporting complex object-relational mapping for platform entities.
- Containerized services using **Docker** and configured basic CI/CD pipelines with **Jenkins** for automated testing and deployment to development environments.

BIM Integration for Sustainable Building Design (MSc Project)

- Developed a proof-of-concept integrating **Revit models** with custom analysis scripts to assess building energy performance, enhancing sustainable design exploration.
- Utilized **Rhino and Grasshopper** for parametric studies on building form, generating multiple design options based on environmental performance criteria.
- Communicated design iterations and findings through detailed visualisations and reports, simulating the output for **project stakeholders**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
