HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for cross-service communication and data exchange, handling approximately **4,500 requests per second** during peak loads.
- Designed and implemented **Hibernate** entities and JPA mappings for a core banking data persistence layer, ensuring data integrity and efficient retrieval across multiple relational databases.
- Engineered **Python scripts** for automating ETL processes, transforming and loading data from diverse sources into a centralized data warehouse, reducing manual data preparation time by **30%**.
- Participated in code reviews and technical estimations for new feature development, adhering to **Agile methodologies** and contributing to sprint planning activities.
- Contributed to the development and maintenance of **CI/CD pipelines** using Jenkins, automating build, test, and deployment processes to streamline the release cycle.
- Managed incident response for production systems, performing root cause analysis and implementing fixes for critical issues, ensuring adherence to defined **SLAs**.
- Containerized Java applications using **Docker**, building images and managing container lifecycles for consistent deployment across development and production environments.

SKILLS

Languages – Java, Python, SQL, R, HTML, CSS

Frameworks/Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI, React, Angular

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

BI/Analytics – Power BI, Tableau, DAX, Power Query, RStudio

Tools/Methodologies – Jira, Confluence, Agile, Scrum, Linux Shell Scripting, Splunk, Dynatrace

PROJECTS

Enterprise Java Application Modernization

- Refactored a legacy Java application module into a **Spring Boot** microservice, implementing **REST APIs** and improving system modularity.
- Integrated the new microservice with existing PostgreSQL databases using **Hibernate**, ensuring seamless data migration and transactional consistency.
- Achieved a **20% reduction** in average API response times by optimizing database queries and implementing caching strategies.

Python-Based Data Processing Pipeline

- Developed a **Python**-based ETL pipeline to ingest and transform financial transaction data from multiple sources.
- Utilized **pandas** and SQL to clean, validate, and aggregate data, preparing it for downstream reporting and analysis.
- Automated the pipeline execution using scheduled jobs, reducing manual data collation effort by approximately **15 hours per week**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
