HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained application features and automated tests, including unit, component, and integration tests, using **Java** and **Cucumber** to ensure code quality.
- Designed and implemented end-to-end customer-facing software solutions by integrating test automation frameworks and best practices, directly enabling teams to build the right product.
- Participated in code reviews for application code and test code, collaborating with Scrum team members to improve test coverage and release velocity.
- Enabled the team in designing and developing automation harnesses using **Java** with **Cucumber**, ensuring reliable, portable, and accurate test execution.
- Collaborated with remote and international team members on improving production health and adopting new technologies within the software development lifecycle.
- Wrote and maintained application features and automated tests, including functional, performance, and scenario tests, participating actively in the development process.
- Containerized Java applications using **Docker** and deployed them to a cloud environment, ensuring efficient and scalable operation within the CI/CD pipeline.

SKILLS

Languages – Java, Javascript, Ruby, SQL, Python, HTML, CSS

Frameworks/Libraries – Spring Boot, Cucumber, Angular, Node.js, scikit-learn, pandas, NumPy

Testing Tools – Cucumber, JUnit, Selenium, SOA Test

Web Services – RESTful web services, HTTP

Cloud/DevOps – AWS, Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Automated Testing Framework for Enterprise Applications

- Developed a comprehensive test automation framework using **Java** and **Cucumber** to support functional, integration, and scenario testing for enterprise-level applications.
- Integrated the automation framework into the **Jenkins** CI/CD pipeline, enabling automated test execution upon code commits and reducing manual testing effort by approximately 40%.
- Designed reusable test components and step definitions that improved test maintainability and allowed for rapid creation of new test cases for evolving application features.

Customer-Facing API Test Automation

- Built automated tests for customer-facing **RESTful web services** using **Java** and HTTP protocols to validate API functionality, performance, and error handling.
- Implemented test data management strategies and utilized test doubles to simulate various API responses and edge cases, ensuring thorough coverage of customer interaction scenarios.
- Collaborated with the development team to define API contracts and ensure testability from the design phase, leading to a 15% reduction in post-release defects.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
