PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed REST APIs using **Java Spring Boot** for internal microservices, ensuring seamless data exchange and integration across multiple platforms.
- Implemented robust persistence layers with **Hibernate** and **JPA**, managing complex relational data models and optimizing database interactions for enterprise applications.
- Engineered object-oriented solutions in **Java**, applying design patterns and writing comprehensive **JUnit** and **Mockito** tests to maintain code quality and system stability.
- Collaborated with cross-functional teams to translate client requirements into technical specifications, contributing to sprint planning and providing technical estimations for new features.
- Managed code reviews and mentored junior engineers on best practices for clean code, testing, and efficient development workflows within an Agile framework.
- Containerized multiple Java applications using **Docker** and deployed them to **AWS EC2** instances, establishing basic CI/CD pipelines with **Jenkins** for automated builds and deployments.
- Analyzed system performance and identified bottlenecks using **Splunk** and **Dynatrace**, contributing to incident response and developing runbooks for common production issues.

SKILLS

Programming Languages – Java, Python, SQL, R, TypeScript

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI, NestJS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

DevOps & CI/CD – Docker, Jenkins, Git, Jira, Confluence

BI & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling

Concepts – REST APIs, Microservices, ETL, Data Warehousing, Agile Methodologies, Linux Shell Scripting

PROJECTS

Enterprise Java Microservice for Financial Data Processing

- Developed a suite of Java Spring Boot microservices to ingest and process financial transaction data, ensuring compliance with internal data handling policies.
- Implemented a data persistence layer using **Hibernate** and **PostgreSQL**, managing ~500,000 records daily and supporting ad-hoc reporting requirements for operations teams.
- Containerized the services with **Docker** and deployed them onto **AWS EC2**, setting up basic monitoring with **CloudWatch** to track application health and resource utilization.

Python-based Data Pipeline for Operational Analytics

- Designed and built an automated Python ETL pipeline to extract, transform, and load data from disparate sources into a centralized data warehouse for analytical reporting.
- Utilized **pandas** and **NumPy** for data manipulation and cleansing, processing approximately 2.5 GB of data nightly and reducing manual data preparation effort by 80% for the analytics team.
- Developed scheduled reporting scripts that generated daily operational summaries, improving visibility into key performance indicators for management stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
