PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Fabricated prototype components using **hand tools** and **power tools**, ensuring adherence to assembly drawings and schematics for electromechanical systems.
- Assembled and wired **control boxes**, **low-voltage systems**, and **test rigs**, meticulously interpreting wiring diagrams under engineering supervision.
- Supported the **testing of mechanical and electrical systems**, accurately recording and analysing experimental results for prototype evaluation.
- Assisted in diagnosing faults in equipment through **circuit-level debugging** and component verification, contributing to equipment repair and maintenance.
- Prepared technical documentation including **test reports**, **wiring schedules**, and **SOPs**, ensuring clear communication of engineering processes.
- Managed inventory of lab equipment and parts, coordinating with suppliers for efficient **parts sourcing** and project organisation.
- Participated in **design reviews** and brainstorming sessions, contributing to prototype evaluations and ad-hoc engineering tasks to support team priorities.

SKILLS

Electrical Assembly – Wiring, Sensors, Control Panels, Switchboards, Test Rigs, Cable Harnesses, Low-Voltage Systems

Mechanical Fabrication – Hand Tools, Power Tools, Workshop Equipment

Troubleshooting & Repair – Circuit-Level Debugging, Component Replacement, Preventive Maintenance

Data & Documentation – Test Reports, Wiring Diagrams, Schematics, SOPs, Inventory Management

Programming Exposure – Python, Arduino

PROJECTS

Prototype Assembly for Environmental Monitoring Units

- Assembled electromechanical prototypes for environmental monitoring devices, integrating sensors and control modules based on detailed schematics.
- Wired custom control boxes and low-voltage power distribution systems, performing continuity and basic functional tests on completed assemblies.
- Documented assembly procedures and component lists, contributing to the creation of standardised operating procedures for prototype builds.

Automated Data Collection for Water Treatment Rigs

- Developed Python scripts to automate data collection from sensors on water treatment test rigs, capturing flow rates, pressure, and chemical levels.
- Configured basic data logging mechanisms and performed initial data validation to ensure accuracy for experimental analysis.
- Assisted in setting up test experiments, collecting structured data using custom scripts and basic logging tools.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
