PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Supported the **monitoring and analysis** of clean utility systems, including water, steam, and compressed gases, to ensure reliable site operations.
- Assisted in collecting, organising, and interpreting **energy and water consumption data** to support site sustainability objectives, identifying areas for efficiency improvements.
- Prepared **technical documentation, reports, and presentations** for internal stakeholders, detailing utility system performance and sustainability initiatives.
- Participated in **continuous improvement projects** focused on reducing the environmental impact of utility operations, contributing to process optimisation.
- Contributed to the review and update of **standard operating procedures and technical specifications** for clean utility systems, ensuring compliance and clarity.
- Supported audit and inspection readiness activities by organising and maintaining relevant **documentation**, ensuring adherence to regulatory standards.
- Designed and implemented **Python scripts** to automate the collection and aggregation of utility system performance metrics, reducing manual data entry time by approximately **15%**.

SKILLS

Utilities & Sustainability – Clean Utilities, Water Systems, Steam Systems, Compressed Gases, Energy Consumption, Water Consumption, Environmental Impact, Sustainability Initiatives, Process Optimisation.

Data Analysis & Reporting – Data Collection, Data Organisation, Data Interpretation, Technical Documentation, Report Preparation, Presentations, Data Visualisation.

Engineering Principles – Engineering Principles, Chemistry Principles, Environmental Science Principles, Technical Data Interpretation, Process Documentation.

Software & Tools – Microsoft Excel, Microsoft PowerPoint, Microsoft Word, Python, Splunk, Dynatrace, Jira, Confluence.

Process & Compliance – Continuous Improvement, Standard Operating Procedures (SOPs), Technical Specifications, Audit Readiness, Regulatory Compliance, GMP.

Project Management & Collaboration – Cross-functional Collaboration, Team Meetings, Action Item Documentation, Task Management, Structured Environment, Independent Work, Collaborative Work.

PROJECTS

Utility System Performance Monitoring Dashboard

- Developed a **Power BI dashboard** to visualise key performance indicators for water, steam, and compressed gas systems, enabling real-time operational oversight.
- Engineered **Python scripts** to ingest and transform raw sensor data from utility systems, preparing it for analysis and visualisation in the dashboard.
- Collaborated with facilities engineers to define critical metrics and ensure the dashboard accurately reflected system status and sustainability efforts.

Energy Consumption Data Analysis Automation

- Created automated **Python scripts** to collect and consolidate energy consumption data from multiple sources across an industrial site.
- Applied **data analysis** techniques to identify patterns and trends in energy usage, contributing to a report highlighting potential savings of approximately **10-12%**.
- Documented the data pipeline and analysis methodology to support ongoing sustainability reporting and process improvement initiatives.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
