HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and deployed secure infrastructure on **AWS** using **Terraform** for automated provisioning and configuration management, aligning with Infrastructure as Code principles.
- Developed Python scripts to automate the application of security patches across cloud infrastructure, operating systems, and software dependencies, reducing manual intervention time by **40%**.
- Integrated **AI tools** into CI/CD pipelines to enable automated build-error resolution and dynamic test orchestration, significantly speeding up root cause analysis for deployment failures.
- Implemented agentic workflows and automated log analysis using **Splunk** and custom Python scripts to reduce alert fatigue and speed up incident response, decreasing P1 incident resolution time by **15%**.
- Partnered with software development teams to embed security best practices and conduct code reviews, ensuring vulnerabilities were addressed early in the development lifecycle.
- Contributed to an on-call rotation, responding to production incidents and resolving system outages with a focus on maintaining high availability and system reliability.
- Built and maintained comprehensive documentation, including runbooks and playbooks, for incident response procedures and infrastructure management best practices.

SKILLS

Cloud Platform – AWS, EC2, S3, Lambda, CloudWatch, ECS/EKS, AWS AI services

Infrastructure as Code – Terraform, Sceptre

Programming & Scripting – Python, Java, Spring Boot

DevOps & CI/CD – Docker, Jenkins, GitHub Actions, Git

Security & Patching – Vulnerability Remediation, Security Patching, Incident Response

Observability & Monitoring – Splunk, Dynatrace, Log Analysis, Alerting

AI & Automation – AI Coding Agents, Agentic Workflows, Automation Frameworks

PROJECTS

Secure AWS Infrastructure Deployment (HCL Technologies)

- Automated the provisioning and configuration of secure AWS infrastructure, including **VPC**, **EC2 instances**, and **S3 buckets**, using **Terraform**, ensuring consistent and repeatable deployments.
- Implemented security best practices within the infrastructure, such as network segmentation, security group rules, and IAM policies, to harden the cloud environment.
- Integrated **Jenkins** pipelines to automate the deployment and testing of infrastructure changes, improving deployment velocity and reducing manual errors.

Automated Patch Management System (HCL Technologies)

- Developed a Python-based automation tool to identify and apply security patches to Linux servers and application dependencies across a fleet of **50+ instances**.
- Integrated the tool with **Jira** for ticket tracking and status updates, providing visibility into patch deployment progress and compliance for enterprise systems.
- Designed and implemented a rollback mechanism within the automation to mitigate risks associated with faulty patches, ensuring system stability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
