PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained enterprise-grade **Power BI** dashboards and reporting solutions supporting strategic initiatives within Transaction Banking, translating business requirements into actionable insights.
- Designed and implemented complex **DAX measures** and data models within Power BI to support financial reporting, ensuring data accuracy and performance for management information.
- Automated data extraction and transformation processes using **Python scripting** and **SQL**, reducing manual effort by approximately 30% for recurring operational reports.
- Collaborated with business stakeholders and Data Engineers to gather requirements for new reporting features, ensuring alignment with enterprise standards and user needs.
- Managed the full lifecycle of Power BI reports, from initial development and testing through to deployment and ongoing maintenance, supporting approximately 15 key operational dashboards.
- Performed data validation and ad-hoc analysis using **SQL** across PostgreSQL and Oracle databases to support business inquiries and troubleshoot data discrepancies.
- Containerized Java Spring Boot applications using **Docker** for consistent deployment across development and production environments on AWS.

SKILLS

BI & Data Visualization – Power BI, Tableau, DAX, Power Query, Data Modelling

Programming Languages – Python, SQL, Java

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Backend Frameworks – Spring Boot, REST APIs

Data Analysis & ML – pandas, NumPy, scikit-learn, R / RStudio, Statistical Analysis

PROJECTS

Financial Operations Dashboard Enhancement (HCL Technologies)

- Enhanced a payments operations dashboard for a financial-services client by developing new **Java Spring Boot** microservices to process and display real-time transaction status updates.
- Implemented robust **SQL queries** across PostgreSQL and Oracle to aggregate and validate transaction data, improving the accuracy of operational reporting by 15%.
- Integrated **Splunk** logs for enhanced monitoring and alerting on critical payment processing workflows, reducing incident response time by an average of 20%.

MSc Data Analytics Capstone: Customer Churn Prediction

- Developed a predictive model using **scikit-learn** (Logistic Regression, Random Forest) on a customer dataset of 50,000 records to identify factors contributing to churn.
- Engineered features and performed exploratory data analysis using **Python** (pandas, NumPy) and **SQL**, achieving an F1 score of 0.78 on identifying at-risk customers.
- Created interactive **Power BI** dashboards to visualize churn drivers and model predictions for business stakeholders, facilitating targeted retention strategies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
