HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Kubernetes** cluster configurations and deployments using **Terraform**, automating infrastructure provisioning for new services.
- Managed and maintained **Linux** server environments, including system patching, security hardening, and performance tuning for production workloads.
- Developed **Python** scripts to automate repetitive deployment tasks and streamline CI/CD pipelines, reducing manual intervention by approximately 40%.
- Collaborated on the design and implementation of **IaC** principles using **Terraform**, integrating with **GitHub Actions** and **Jenkins** to optimize deployment workflows.
- Implemented infrastructure security best practices across cloud environments, including access control, network segmentation, and vulnerability scanning.
- Authored and maintained comprehensive documentation for infrastructure components, deployment procedures, and operational runbooks.
- Containerised applications using **Docker** and managed container orchestration for scalable deployments on **Kubernetes**.

SKILLS

Cloud Platform – AWS (EC2, S3, Lambda, CloudWatch)

Containerization & Orchestration – Docker, Kubernetes

Infrastructure as Code – Terraform

CI/CD – Jenkins, GitHub Actions

Scripting & Automation – Python, Bash

Operating Systems – Linux

Database – PostgreSQL, MySQL, Oracle

PROJECTS

Automated Cloud Infrastructure Deployment

- Developed a **Terraform** module to provision scalable infrastructure on **AWS**, including VPCs, EC2 instances, and S3 buckets, for new application deployments.
- Integrated **Terraform** with **Jenkins** pipelines to enable automated, repeatable infrastructure deployments, reducing deployment time for new environments by 60%.
- Managed application containerisation using **Docker**, ensuring consistent runtime environments across development and production.

Linux System Automation and Monitoring

- Created **Python** and **Bash** scripts to automate system administration tasks on **Linux** servers, such as log rotation, user management, and package updates.
- Implemented monitoring solutions using **CloudWatch** and **Splunk** to track system health, application performance, and resource utilization, enabling proactive issue detection.
- Configured **cron** jobs for scheduled maintenance and reporting tasks, improving operational efficiency.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
