HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed **production environments** for enterprise utility systems, ensuring **SLA adherence** and responding to critical P1/P2 incidents using **Splunk** and **Dynatrace**.
- Developed **Python scripts** to automate data extraction and reporting for utility asset performance, processing approximately **15,000 records** per run.
- Designed and maintained **Java Spring Boot REST APIs** for integrating disparate utility control systems, facilitating data exchange across platforms.
- Led the development of **utility dashboards** in **Power BI**, visualizing key performance indicators from **SCADA** and **Historian** data for the Utilities Department.
- Gathered and analyzed **utility performance data** from **CHP**, **steam generation**, and **compressed air** systems to identify optimisation opportunities, reducing energy consumption by **12%**.
- Implemented automation opportunities using **PLC** and **BMS** systems to enhance reliability and operational performance of critical plant utilities.
- Containerized utility monitoring services using **Docker** and deployed to **AWS EC2** instances, improving deployment consistency and reducing startup time by **40%**.

SKILLS

Manufacturing Excellence – Manufacturing Excellence, Reliability Engineering, Digitalisation, Performance Management, Continuous Improvement

Automation & Control – PLC, SCADA, BMS, Historian, Automated Manufacturing

Data Analytics & BI – Power BI, Dashboard Development, Data Analytics, Performance Reporting, Data Modelling, DAX, Power Query

Utilities Systems – CHP, Steam Generation, Refrigeration, Compressed Air, HVAC, Water Treatment, Wastewater Systems

Programming & Scripting – Python, Java, Spring Boot, REST APIs, Shell Scripting

Cloud & DevOps – AWS, EC2, Docker, CI/CD, Jenkins, Git

Databases & Support – SQL, PostgreSQL, MySQL, Oracle, Splunk, Dynatrace, Linux

PROJECTS

Utility Performance Monitoring Dashboard

- Developed a comprehensive **Power BI dashboard** to track KPIs for steam generation, compressed air, and HVAC systems, providing real-time operational insights.
- Integrated data from **SCADA** and plant **Historian** databases using **Power Query**, transforming and modelling raw data for reporting accuracy.
- Presented dashboard findings to the **Utilities Department management**, highlighting areas for efficiency improvements that led to a targeted **8% energy reduction** initiative.

Automated Production Data Pipeline

- Engineered a **Python data pipeline** on **AWS Lambda** to ingest and process production data from various manufacturing lines, handling approximately **2,000 data points** per hour.
- Implemented automated data validation and cleaning routines to ensure data integrity for downstream **performance reporting** and analysis.
- Built scheduled reporting jobs using **cron** on a **Linux** server, delivering daily summaries to operations teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
