PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Acted as a technical specialist supporting multiple enterprise SaaS accounts, addressing recurring support cases and performing short-term project-based technical engagements to resolve complex customer issues.
- Led hands-on platform optimization for enterprise clients, conducting configuration reviews and implementing best-practice setups that proactively tuned systems and prevented recurring issues, documented via CRM recaps.
- Partnered with Customer Success Managers to assess customer technical needs, participating in investigative calls and determining appropriate next steps for platform optimization and issue resolution.
- Advised clients on underutilized contracted features of the platform, identifying and flagging potential upsell opportunities for professional services or deployment engagements.
- Designed and implemented RESTful APIs in **Java Spring Boot** for cross-service data exchange, ensuring request validation and incorporating circuit-breaker patterns to enhance system resilience.
- Managed incident response for production enterprise applications, including **P1/P2 incident triage** and root cause analysis, maintaining service level agreements (SLAs) for critical systems.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, integrating with Jenkins for CI/CD pipelines to ensure smooth code integration and release cycles.

SKILLS

Customer-Facing – Technical Account Management, Customer Solutions Engineering, Professional Services, Deployment, Solutions Engineering, Technical Support

Platform & Security – Email Infrastructure, IT Security, SaaS, Cybersecurity, Platform Configuration, Best Practices

Technical Skills – Triage Judgment, Investigation, System Tuning, API Development, CI/CD, Docker, AWS, Java, Spring Boot, Python, SQL, Linux, Splunk, Dynatrace

Communication – Technical Documentation, CRM, Stakeholder Communication, Presentations

Email Protocols – Email Authentication, Email Delivery Protocols, Microsoft 365, Google Workspace

PROJECTS

Enterprise SaaS Platform Optimization Initiative

- Led a targeted initiative to optimize the configuration of a core SaaS platform for three enterprise clients, improving system performance and stability by identifying and rectifying common misconfigurations.
- Developed a standardized checklist and documentation for platform best practices, which was then used in customer onboarding sessions to accelerate time-to-value and ensure optimal feature adoption.
- Collaborated directly with client technical teams to gather requirements for platform tuning, presenting findings and implemented solutions in post-implementation review sessions.

Internal Tooling for Production Incident Triage

- Engineered Python scripts to automate the aggregation and analysis of logs from Splunk and Dynatrace, reducing manual effort in identifying root causes for production incidents by an estimated 40%.
- Developed a dashboard using **Flask** and basic HTML/CSS to visualize key operational metrics and alert patterns, aiding the support team in faster P1/P2 incident triage.
- Wrote comprehensive runbooks for common production issues, which were integrated into the team's knowledge base, enabling quicker resolution times for recurring problems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
