PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed intuitive digital experiences across multiple platforms, translating user needs and business requirements into tangible design concepts and interactive prototypes using **Figma**.
- Supported end-to-end design processes, from initial discovery and concept development through to detailed interface design and implementation for new digital products.
- Applied **human-centred design** and **service design** principles to create accessible and effective user experiences, focusing on user behaviour and needs analysis.
- Created detailed wireframes, user flows, information architectures, and high-fidelity UI designs, ensuring alignment with technical considerations and business objectives.
- Collaborated with a multidisciplinary team of designers, engineers, and data scientists to refine design concepts and communicate decisions through effective visual storytelling and presentations.
- Explored and integrated emerging technologies, including **Generative AI** and conversational interfaces, into new interaction patterns and design approaches to enhance user experiences.
- Contributed to user research activities, analysing and synthesising findings to identify key insights and opportunities for product and service improvement.

SKILLS

Design Tools – Figma, Adobe Creative Suite, Generative AI design tools

Design Principles – Interaction Design, Product Design, UX/UI Design, Service Design, Human-Centred Design, Accessibility Standards, Inclusive Design

Prototyping – Wireframing, User Flows, Information Architecture, High-Fidelity UI Design, Interactive Prototypes, Rapid Prototyping

Collaboration – Multidisciplinary Teams, Agile Product Development, Design Reviews, Subject-Matter Experts, Business Stakeholders

Emerging Technologies – Generative AI, Conversational AI, Voice Interfaces, Mixed Reality

Research & Analysis – User Research, Usability Testing, Data Synthesis, Conceptual Models

PROJECTS

User-Centric Design for Digital Service Platform

- Developed a comprehensive design system for a new digital service platform, encompassing wireframes, user flows, and high-fidelity prototypes in **Figma**.
- Conducted user research sessions with target user groups to gather feedback on initial design concepts, iterating on solutions based on insights.
- Collaborated with software engineers to ensure designs were technically feasible and aligned with project timelines and objectives, facilitating smooth implementation.

Interactive Prototype for Emerging Technology Showcase

- Designed an interactive prototype demonstrating the application of **Generative AI** for customer support interactions, creating a seamless conversational interface.
- Mapped out complex user journeys and information architecture to ensure intuitive navigation and task completion within the prototype.
- Presented the prototype and design rationale to stakeholders, highlighting how the new interaction patterns addressed user needs and business value.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
