PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Responded to **unscheduled service calls** and completed **scheduled maintenance** across customer sites in the Midlands region, ensuring minimal disruption to operations.
- Commissioned new equipment, validating orders and ensuring all necessary accessories were installed and functional for immediate use by the customer.
- Executed **regulatory field actions** and completed required documentation, adhering to compliance standards for all on-site activities.
- Provided on-site **troubleshooting, test, repair, and service** for advanced equipment, diagnosing and resolving technical issues effectively.
- Delivered **product training** and responded to specific customer needs during on-site visits, enhancing user proficiency and satisfaction.
- Maintained accurate **spare parts stock levels** by liaising with the Inventory & Logistics Department, preventing stockouts and ensuring readiness for repairs.
- Produced timely and detailed **service/repair reports**, identifying key issues and communicating incident details in a formal, professional manner.

SKILLS

Field Service – Service, Repair, Installation, Commissioning, Maintenance, Troubleshooting

Engineering – Electrical, Mechanical, Advanced Equipment, Technology

Customer Interaction – Customer Focus, Interpersonal Skills, Training, Communication

Operations – Logistics, Inventory Management, Regulatory Compliance, ISO Quality Management

IT & Software – Basic Computer Skills, Networking Experience

PROJECTS

On-Site Equipment Commissioning and Support (HCL Technologies)

- Managed the end-to-end commissioning process for new enterprise equipment at client locations, ensuring successful integration and readiness for use.
- Conducted diagnostic tests and performed repairs on installed systems, resolving technical issues to maintain operational uptime for a key financial services client.
- Documented all service activities, including repairs and regulatory actions, in detailed reports for client and internal review.

Field Service Automation and Reporting (HCL Technologies)

- Developed Python scripts to automate the generation of daily service reports, consolidating data from multiple sources and reducing manual reporting effort by **~40%**.
- Implemented a system for tracking spare parts inventory via shell scripts and cron jobs, ensuring critical components were always available for field technicians.
- Collaborated with cross-functional teams, including operations and product support, to streamline the field service workflow and improve response times.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021
