HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Performed quantitative analysis and data investigations on credit risk portfolios, contributing to enhanced business decision-making and risk management strategies.
- Contributed to the development and testing of predictive models for capital and impairment, ensuring alignment with regulatory expectations and model explainability.
- Executed exploratory data analysis on bank datasets to identify emerging risk trends and uncover actionable insights for business partners.
- Developed risk segmentations and analytical profiles of customer behavior to support more effective risk management strategies.
- Accesssed and analysed sensitive bank data using **SQL** and **Python**, adhering strictly to data governance standards and security protocols.
- Contributed to the development, enhancement, and testing of **credit decisioning models**, supporting model coding, data preparation, and execution.
- Managed and containerized analytical workloads using **Docker** and deployed on **AWS EC2** instances for scalable data processing.

SKILLS

Programming Languages – SQL, R, Python, SAS, Matlab

Data Analysis & Modelling – Quantitative Analysis, Risk Modelling, Scenario Analysis, Statistical Modelling, Exploratory Data Analysis, Predictive Modelling, Risk Segmentation

Tools & Technologies – Power BI, Tableau, scikit-learn, pandas, NumPy, R/RStudio, SAS, Docker, AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Methodologies – Agile/Scrum, Data Governance, Change Management

PROJECTS

Credit Risk Portfolio Analytics Platform

- Developed a **Python**-based analytical platform to process and analyse large volumes of credit data, enabling detailed portfolio risk segmentation.
- Implemented **SQL** queries against a PostgreSQL database to extract and transform historical transaction data for risk model feature engineering.
- Generated interactive **Power BI** dashboards visualizing key risk indicators and portfolio performance trends for senior risk management stakeholders.

Impairment Model Validation Framework

- Built a statistical analysis framework in **R** to validate the performance of existing impairment models against historical data.
- Executed hypothesis testing and regression analysis to assess model accuracy and identify areas for enhancement, presenting findings to the analytics team.
- Contributed to the documentation of model validation procedures, ensuring compliance with internal risk policies and regulatory guidelines.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
