HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **fault-tolerant cloud infrastructure** on **AWS** using **Terraform**, enabling automated provisioning and scaling for production services.
- Developed and maintained **observability tools**, including configuring **Prometheus** and **Grafana** for real-time system monitoring, logging, and alerting across distributed applications.
- Automated **incident response workflows** using **Python scripting**, reducing manual intervention time for critical alerts by approximately **40%**.
- Collaborated with development teams to integrate **reliability best practices** into the software development lifecycle, improving system design for high availability.
- Conducted **root cause analysis** for system failures, producing detailed post-mortem reports and implementing preventative measures that decreased recurring incidents by **15%**.
- Enhanced **CI/CD pipelines** with Jenkins, incorporating automated testing and deployment strategies to increase deployment frequency by **30%** while maintaining stability.
- Managed and optimized **Linux system administration** tasks, including shell scripting for automation and log analysis to ensure operational efficiency.

SKILLS

Cloud Platforms – AWS, Azure, GCP

Observability – Prometheus, Grafana, Datadog, ELK Stack, New Relic

Infrastructure as Code (IaC) – Terraform, CloudFormation, Pulumi

Containerization & Orchestration – Docker, Kubernetes, Helm

Operating Systems & Networking – Linux, Bash Scripting, TCP/IP

Scripting & Automation – Python, Bash, Go

System Design & Reliability – Load Balancing, Failover, Disaster Recovery, Incident Management, RCA

PROJECTS

Scalable Cloud Infrastructure Automation (HCL Technologies)

- Automated the provisioning of **AWS** resources (EC2, S3, RDS) using **Terraform**, enabling rapid deployment of development and staging environments.
- Implemented **CI/CD pipelines** with Jenkins and Git for automated build, test, and deployment of Java Spring Boot applications to containerized environments.
- Configured **Docker** containers and basic **Kubernetes** deployments to manage application lifecycle and ensure consistent environments across development and production.

Real-time System Monitoring and Alerting

- Developed custom **Python** scripts to parse application logs and extract key metrics for ingestion into **Prometheus**.
- Configured **Grafana** dashboards to visualize system performance, application health, and key operational indicators for a distributed enterprise system.
- Established automated alerting rules in **Prometheus** for critical thresholds, reducing average response time to production issues by approximately **20%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
