PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Supported and optimized critical healthcare IT systems, including troubleshooting issues, performing system upgrades, and maintaining stability for a hospital infrastructure.
- Gathered and translated clinical and operational requirements into technical solutions by collaborating with clinicians and IT stakeholders to ensure system usability.
- Provided system support, training, and documentation to healthcare teams, enabling effective and reliable use of technology across hospital environments.
- Developed Python scripts for data pipelines and scheduled reporting, automating data extraction and transformation processes for internal analytics.
- Managed production support and monitoring for enterprise applications using Splunk and Dynatrace, focusing on SLA management and P1/P2 incident response.
- Designed and implemented REST APIs using Java Spring Boot for cross-service data exchange, incorporating request validation and error handling patterns.
- Containerized Java Spring Boot services with Docker, deploying to AWS EC2 instances and configuring basic resource limits for predictable performance.

SKILLS

Healthcare IT Systems – EHR, clinical applications, hospital infrastructure, data annotation, data quality, evaluation systems.

System Support & Optimization – Troubleshooting, testing, system upgrades, technical solutions, workflow analysis, documentation.

Programming Languages – Python, Java.

Frameworks & Libraries – Spring Boot, pandas, NumPy.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git.

Databases & Scripting – SQL (PostgreSQL, MySQL, Oracle), Shell scripting.

Monitoring & Operations – Splunk, Dynatrace, Jira, Confluence.

PROJECTS

Clinical Systems Enhancement for Hospital Operations

- Assisted in the optimization of a hospital's electronic health record (EHR) system by developing Python scripts to automate data validation checks, reducing manual errors by an estimated 15%.
- Collaborated with clinical staff to document system workflows and translate user feedback into actionable technical improvement requirements for the EHR platform.
- Supported the implementation of system upgrades by performing pre- and post-testing, ensuring minimal disruption to daily clinical operations.

Automated Data Pipeline for Healthcare Analytics

- Engineered a Python-based ETL pipeline to extract, transform, and load data from disparate clinical system logs into a centralized PostgreSQL database for reporting.
- Developed automated daily reports using SQL queries and pandas to provide key operational metrics to the hospital's IT management team.
- Implemented data quality checks within the pipeline to ensure data integrity for downstream analytical processes.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
