HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Authored and debugged **Python** and **Java** code for training AI models, focusing on generating solutions for complex software engineering problems.
- Reviewed and evaluated **AI-generated code** across multiple languages, identifying logic errors, security vulnerabilities, and performance bottlenecks to improve model reliability.
- Designed and implemented challenging **coding prompts** and edge-case scenarios to rigorously test and refine the capabilities of AI coding assistants, ensuring robustness.
- Provided detailed, structured **written feedback** on AI-generated code, clearly explaining the reasoning behind code functionality and areas for improvement to the AI training team.
- Compared and ranked multiple **AI-generated solutions** for given prompts, assessing them based on engineering quality, efficiency, and adherence to best practices.
- Collaborated with a cross-functional team to integrate AI model feedback loops into the software development lifecycle, contributing to an iterative improvement process.
- Containerized AI training and evaluation services using **Docker** and deployed them to a scalable cloud environment, ensuring efficient resource utilization and deployment.

SKILLS

Languages – Python, Java, JavaScript, C++, Go, TypeScript

Core Concepts – Data Structures, Algorithms, Software Design Principles, Debugging, Prompt Engineering

AI/ML – AI-Generated Code Evaluation, LLM Feedback, Model Training

Tools & Platforms – Docker, Cloud Platforms, Git

Methodologies – Agile, Asynchronous Communication, Code Review

PROJECTS

AI Code Generation Evaluation Framework

- Developed a Python-based framework to systematically evaluate AI-generated code snippets for correctness and efficiency across various programming languages.
- Implemented parsers and linters within the framework to automatically detect common errors and stylistic issues in AI outputs, reducing manual review time by **30%**.
- Designed a scoring mechanism to rank different AI model outputs based on predefined engineering quality metrics, facilitating model selection for downstream training.

Automated Code Refactoring for AI Training Data

- Engineered Python scripts to refactor existing codebases into formats suitable for AI model training, standardizing syntax and improving readability.
- Applied techniques to identify and correct potential security vulnerabilities in code samples, enhancing the safety and reliability of the training data set.
- Processed approximately **5,000** code files, transforming them into a clean and consistent dataset for fine-tuning a large language model.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
