PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **EVPN/VXLAN overlay network** solutions for enterprise LAN environments, ensuring scalable segmentation across thousands of devices.
- Automated network configuration deployment and validation for hundreds of thousands of LAN devices using **Python** and **CI/CD pipelines**, reducing manual intervention by approximately 40%.
- Developed and maintained **BGP** and **OSPF** routing configurations, contributing to the stability and performance of a large-scale campus network infrastructure.
- Collaborated with cross-functional teams to gather requirements and translate them into technical designs for network infrastructure upgrades, participating actively in design reviews.
- Mentored junior engineers on network automation best practices and provided technical guidance on complex LAN infrastructure challenges.
- Drove root cause analysis for network events impacting business operations, implementing corrective actions to enhance network reliability and minimize downtime.
- Containerized network automation tools using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and operational efficiency.

SKILLS

Networking Protocols – BGP, OSPF, EVPN, VXLAN, LISP, VRF

Network Hardware – Cisco, Juniper

Automation & Scripting – Python, Shell Scripting

Cloud & Orchestration – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes, Jenkins

Operating Systems – Linux

Methodologies – Agile, Scrum

PROJECTS

Large-Scale LAN Automation Framework

- Developed a Python-based framework to automate the provisioning and configuration management of network devices across multiple enterprise sites, targeting **commodity hardware**.
- Integrated the framework with **Jenkins** for CI/CD, enabling automated testing and deployment of network configurations, and reducing deployment times by an estimated 30%.
- Implemented **BGP** and **OSPF** configuration modules within the framework, ensuring adherence to network design standards and operational best practices.

Network Segmentation and Reliability Initiative

- Designed and implemented zone-based network segmentation using **VRF** and firewall integration to enhance security posture for critical infrastructure.
- Authored detailed technical documentation and runbooks for new network designs, facilitating operational handover and improving fault detection capabilities.
- Collaborated with operations teams to troubleshoot and resolve complex network incidents, contributing to improved incident response times and system stability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
