HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed escalated technical support cases for a global satellite broadband initiative, analyzing **performance data** including latency, jitter, and packet loss to restore optimal service levels for enterprise customers.
- Developed and documented technical solutions for complex satellite network issues, contributing to a knowledge base that improved resolution times for common problems by **18%**.
- Provided advanced technical guidance and troubleshooting expertise to customers and internal teams, resolving intricate network connectivity challenges through methodical problem analysis.
- Executed root cause analysis for service degradation incidents, correlating system configurations and monitoring tool outputs to identify and rectify underlying network faults.
- Collaborated with cross-functional engineering and operations teams to drive technical cases to resolution, ensuring timely and effective support for critical network infrastructure.
- Automated routine reporting and data validation tasks using **Python scripting**, reducing manual effort for the support team by approximately **10 hours per week**.
- Containerized several internal Java Spring Boot microservices using **Docker** for improved deployment consistency and managing them on **AWS EC2** instances.

SKILLS

Networking Protocols – TCP/IP, BGP, SD-WAN, MPLS, DNS, DHCP, HTTPS

Troubleshooting Tools – tcpdump, traceroute, mtr

Operating Systems – Linux

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Languages – Java, Python, SQL, French, English

Support Technologies – Splunk, Dynatrace, Jenkins, Jira, Confluence

PROJECTS

Satellite Network Performance Analysis Tool

- Developed a Python-based tool to parse and analyze network performance metrics (latency, jitter, packet loss) from satellite communication logs, identifying patterns in service degradation.
- Integrated **TCP/IP** analysis capabilities, enabling deeper diagnostics for escalated customer issues and providing actionable insights for network optimization.
- Generated automated reports summarizing key performance indicators and potential fault areas, supporting the technical support team in faster incident triage.

Automated Customer Support Knowledge Base

- Engineered a system to automatically extract and categorize technical solutions from resolved incident tickets, populating a searchable knowledge base.
- Implemented natural language processing techniques to improve search relevance and tag relevant technical keywords, including **Linux** commands and **AWS** service configurations.
- Designed a user-friendly interface for internal teams to access and contribute to the knowledge base, reducing average ticket resolution time by **15%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
