PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Diagnosed and resolved escalated satellite network performance issues, analyzing **latency**, **jitter**, and **packet loss** metrics to restore optimal service levels for enterprise customers.
- Managed L3 NOC operations, responding to critical incidents and driving technical cases to resolution through methodical problem analysis and emergency response protocols.
- Developed and documented **technical solutions** and best practices for satellite network configurations, contributing to a knowledge base used by support engineers and customer teams.
- Provided advanced technical guidance and troubleshooting support to **Spanish-speaking enterprise customers** experiencing service degradation, ensuring effective communication and timely resolution.
- Collaborated with cross-functional engineering and operations teams to identify root causes of complex network problems and implement sustainable technical fixes.
- Performed analysis of **system configurations** and network protocols, including **TCP/IP**, **DNS**, and **DHCP**, to pinpoint and rectify service anomalies.
- Containerized core Java Spring Boot services with **Docker** and deployed them to a Kubernetes cluster on **AWS EKS**, configuring basic resource limits for predictable rollouts.

SKILLS

Networking – TCP/IP, BGP, SD-WAN, MPLS, DNS, DHCP, HTTPS, satellite network

Troubleshooting Tools – tcpdump, traceroute, mtr, Wireshark, Splunk, Dynatrace

Operating Systems – Linux, Windows Server

Cloud – AWS (EC2, S3, Lambda, CloudWatch, EKS)

Languages – Spanish, English

Software Development – Java, Spring Boot, Python, REST APIs

DevOps – Docker, Jenkins, Git, Kubernetes

PROJECTS

Satellite Network Performance Optimization (HCL Technologies)

- Engineered Python scripts to automate the collection and analysis of network telemetry data, including **packet loss** and **jitter** from satellite uplinks, reducing manual analysis time by **40%**.
- Developed a Java Spring Boot application to parse and visualize performance metrics from multiple satellite ground equipment components, providing real-time operational dashboards.
- Collaborated with the client's network operations center to integrate automated alerting for service degradation events, improving response times for P1 incidents.

Customer Onboarding for Enterprise Connectivity (HCL Technologies)

- Acted as the primary technical contact for two enterprise customers during the onboarding process for a new connectivity solution, gathering specific network requirements and integration details.
- Designed and documented integration procedures for customer networks, including configuration of **DNS** and **DHCP** settings, ensuring seamless service activation.
- Provided post-implementation technical guidance and training to customer IT teams on managing the new satellite network infrastructure.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
