HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for core business functionalities, handling approximately **500 requests per minute**.
- Designed and implemented efficient data retrieval and manipulation logic using **Hibernate**, optimizing database interactions and reducing query latency by **18%**.
- Authored comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving over **90% code coverage** for critical service modules.
- Contributed to the design and deployment of tools and applications for AWS Support Engineers, focusing on improving **case deflection initiatives** and **support process automation**.
- Applied troubleshooting techniques to resolve customer-reported issues, diving deep into the **root cause of problems** within application architectures and integration approaches.
- Participated in **code reviews** and technical discussions to ensure adherence to AWS best practices for applications, servers, and networks.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring scalable and reliable service delivery.

SKILLS

Cloud Platforms – AWS, EC2, S3, Lambda, CloudWatch

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

DevOps & Tools – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Analytics & BI – Power BI, Tableau, DAX, Power Query, data modelling

Operating Systems – Linux, Windows

PROJECTS

Cloud Support Tooling for Case Resolution

- Engineered a Python-based application to automate the retrieval and summarization of customer support logs, reducing manual triage time by **30%** for common issues.
- Integrated with AWS CloudWatch APIs to proactively monitor key application metrics and trigger alerts for potential customer-impacting events, improving incident detection speed.
- Developed a RESTful API using Flask to serve aggregated support data to a central dashboard, enabling faster analysis of support trends.

Java Microservice for Application Health Monitoring

- Built a **Java Spring Boot** microservice that aggregates health check data from multiple enterprise applications, providing a unified view of system status.
- Implemented asynchronous processing for log ingestion using **JPA** and **PostgreSQL**, handling over **1,000 health events per minute**.
- Designed a flexible data model to accommodate diverse application health reporting formats, ensuring compatibility with existing and future services.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
